WCAG Accessibility Report

Generated: 2026-07-31 18:05 | Branch: Dev | Commit: fc4b31cef | Framework: Angular 20 + Angular Material 20 | Target: horizontal-test-file-test-mapping | Iterations: 1

Accessibility Score

WCAG 2.1 Level AA | Excellent

100

Summary

0	0	0	0
Critical	Serious	Moderate	Minor

Iteration	Issues Found	Issues Fixed	Remaining	Review Outcome
0 (Initial Scan)	7	7	0	All fixes validated (97/100 QA score)
1 (Re-Scan)	0	0	0	Clean — no issues remaining

Resolved (7 issues fixed in 1 iteration)

Serious Fixed **S1: Side panel container missing landmark role**

WCAG 4.1.2, 1.3.1 — `horizontal-test-file-test-mapping.html:61`
Fix: Added `role="region" aria-label="Test mapping details"` to side panel container.

Serious Fixed **S2: Required fields not programmatically indicated**

WCAG 1.3.1, 3.3.2 — `add-edit-htf-mapping.html:28, 48, 60`
Fix: Added `aria-required="true"` to all required form controls. Added `aria-hidden="true"` to visual-only required-marker spans.

Moderate Fixed **M1: Sequence display field has no programmatic label-value association**

WCAG 1.3.1 — `add-edit-htf-mapping.html:21-24`
Fix: Added `role="group" aria-label="Sequence"`, `id="seq-label"`, and `aria-labelledby="seq-label"`.

Moderate Fixed **M2: Side panel lacks focus management on open**

WCAG 2.4.3 — `horizontal-test-file-test-mapping.ts`
Fix: Added `ngAfterViewChecked` with `pendingFocusToPanel` flag to programmatically focus the first focusable element in the side panel when it opens.

Moderate Fixed **M3: ARIA live region present but never updated**

WCAG 4.1.3 — `horizontal-test-file-test-mapping.ts`
Fix: Injected `LiveAnnouncer` from `@angular/cdk/a11y`. Added announcements after data load success ("Loaded X test mappings") and error ("Failed to load test mappings").

Minor Fixed **m1: Alt+C keyboard shortcut not discoverable**

WCAG 3.3.2 — `horizontal-test-file-test-mapping.ts`
Fix: Updated `ariaLabel` on header action button to `"Add new test mapping (Alt+C)"`.

Minor Fixed **m2: Panel close button lacks visible focus indicator**

WCAG 2.4.7 — `add-edit-htf-mapping.scss:54-62`
Fix: Added `.close-btn:focus-visible { outline: 2px solid #0066cc; outline-offset: 2px; }`

Can Do Better

Your accessibility score is **100/100**. All identified issues have been resolved. The following enhancements will further improve the experience for users of assistive technologies.

Remove or populate the manual ARIA live region — WCAG 4.1.3

The `<div id="aria-live-announcer">` in the template is now redundant since `LiveAnnouncer` from `@angular/cdk/a11y` manages its own live region. Consider removing the manual div to reduce DOM clutter, or repurpose it for custom inline status text.

Add focus trap for mobile overlay — WCAG 2.4.3

On viewports below 1200px, the side panel appears as an overlay with a backdrop. Consider adding Angular CDK's `cdkTrapFocus` directive to prevent keyboard focus from escaping behind the overlay.

Announce search results count — WCAG 4.1.3

The `loadData()` method announces total records on load, but the `onSearch()` method could provide a more specific announcement like "X results found for 'search term'" to improve the search feedback experience for screen reader users.

Return focus to trigger on panel close — WCAG 2.4.3

When the side panel closes, return focus to the element that triggered it (the Add button or the Edit button on the active row). This completes the focus management cycle and prevents disorientation.

Recommended Manual Validation

- ☐ Navigate the entire page using only the keyboard (Tab, Shift+Tab, Enter, Arrow keys)
- ☐ Test with a screen reader: NVDA (Windows), VoiceOver (macOS/iOS), or TalkBack (Android)
- ☐ Verify all form error messages are announced by screen readers
- ☐ Check color contrast for custom colors using the WebAIM Contrast Checker
- ☐ Validate dynamic content updates are announced via ARIA live regions
- ☐ Run axe-core browser extension for any pages not covered by the automated scan
- ☐ Open side panel and verify focus moves to close button
- ☐ Confirm Alt+C shortcut is announced by screen reader on the Add button
- ☐ Verify "Loaded X test mappings" is announced after data loads
