Post donation Info given	BLEED Entry:	VISNU:	Record Review

DONOR: Please Read And Sign the following Informed Consent

I have reviewed and understand the information provided to me regarding the spread of AIDS virus (HIV) by blood and plasma. If I am potentially at risk for spreading the virus known to cause AIDS, I agree not to donate blood or plasma for transfusion to another person or for further manufacture. Anne Arundel Medical Center performs tests for hepatitis, syphilis, HIV, other retroviruses or infectious agents, and other tests as indicated. We are required to report some positive test results and donor information to the state health department. You will be informed, and counseling will be available if the results of any of these tests are cause for deferral.

NOTE: There may be rare circumstances such as excessive lipemia or hemolysis in which some of the infectious disease tests were unable to be performed. Although we could not use your blood for transfusion purposes, you would not be informed of this occurrence. I understand that if any of my test results or donor information indicate that my blood should not be used for transfusion, my name will be placed on a confidential donor deferral list. If I am a donor with a diagnosis of hereditary hemochromatosis, I understand that therapeutic phlebotomy will be provided free of charge even if I am ineligible as an allogeneic blood donor. A few people feel faint during or soon after donation. The most common adverse reaction to donation is bruising at the donation site. Other rare occurrences are nerve irritation, nerve injury, or tendon injury in the donation arm.

I have accurately answered each question and voluntarily donate my blood to AAMC for use as deemed advisable. And I consent to have my blood drawn and tested for antibody to HIV (See additional State of Maryland Informed Consent for HIV Testing of Donors or Blood, Semen, or Tissue).

Donor Signature: _____ Date _____

Screening Tech: I have reviewed with the donor all the medical history questions and have orally reviewed the questions on high risk activities for AIDS.

Screener Signature: _____ Date _____

Answer Code(s)	**5**	i am typing all this in to test that i can enter a 1000 characters to make sure i can add 1000 into the table and see the question in donor response to make sure it all is appearing and not showing the this will take a long time to type in 1000 characters over and over and over and over and over and over and over again and again and again and again Apart from counting words and characters, our online editor can help you to improve word choice and writing style, and, optionally, help you to detect grammar mistakes and plagiarism. To check word count, simply place your cursor into the text box above and start typing. You'll see the number of characters and words increase or decrease as you type, delete, and edit them. You can also copy and paste text from another program over into the online editor above. The Auto-Save feature will make sure you won't lose any changes while editing, even if you leave the site and come back later. Tip: Bookmark this page now. Heat is on by ABBREVIATED!!!!			Yes
