User GuideDisclaimer

WellSky Corporation provides the WellSky Blood Centers application or licensed software to the customer after extensive planning, designing, and validation of the system. Validation utilizes a range of hardware and data, which is necessarily limited. As such, in-house validation of the system can only assure that the system carries out its functions and routines as designed by WellSky. WellSky cannot represent validation of all functioning possibilities and related consequences under ultimate conditions of use. Any warranty or guarantee, explicit or implied, pertains to the level of quality and functionality of the system's software, as planned, designed and validated by WellSky.

The user facility, not WellSky, is responsible for the control, management, and supervision of the facility's use of the WellSky Blood Centers application or licensed software, including, but not limited to ensuring that proper controls are in place to validate data, outcomes, and results obtained through its use. The user facility must run sufficient validation tests with appropriate frequency on the software and hardware, and on any modifications or supplements thereof as made available by WellSky, to be certain that the facility's use of the Blood Centers system, in the configuration and under the conditions at the facility, meets the facility's requirements in terms of policy, protocol, assumptions, and expectations, regardless of the participation or assistance of WellSky personnel in the form of suggested/published validation procedures and/or verbal discussions regarding Blood Centers systems capabilities, functions, performance, or validation.

WellSky may use data submitted by client and processed through the cloud services for interoperability and transparency between providers, payers, and patients for care coordination; continuity of care; and performance, payment, and claims related activities, including patient matching and claims data sharing with mutual patients of other providers and payers, making the matching patient information visible to these providers and payers. WellSky may aggregate the matching data from providers and payers for the creation, comparison, expansion, amendment, and maintenance of consumer or patient health records necessary for the deployment of features and functionality of the cloud services.

Revision History

Software Release & Date	Document Number	Content Affected	Description of Change
2026 R1 November 2025	WBCGR2026R1_01	All	Updated the document to reflect the current release version and release date.
2026 R1 November 2025	WBCGR2026R1_01	2.2 Suitable Drives for Piggyback Report (MRRSUTPG)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	Chapter 3 - Post Drive Analysis	Formerly Chapter 10 Management Reports, the title was changed to Post Drive Analysis and was moved to become Chapter 3.
2026 R1 November 2025	WBCGR2026R1_01	Chapter 3 - Collection Staff Reports	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	4.3 Track TeleRecruiter Productivity (DERTRTCK)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	4.4 TeleRecruiter Performance Report (DERTRTKP)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	6.3.4 Sample Report	Updated (DNRUNCHG) Sample Report screenshot.
2026 R1 November 2025	WBCGR2026R1_01	6.7.4 Sample Report	Updated (DONREPCL) Sample Report screenshot.
2026 R1 November 2025	WBCGR2026R1_01	6.9.4 Sample Report	Updated (DNRQNSDF) Sample Report screenshot.
2026 R1 November 2025	WBCGR2026R1_01	7.12 List of Donations and Deferrals (DRRUNDEF)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	10.2 Donor Label Printing Report by List ID (DCRDNLBL)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	Chapter 11 - Application Interfaces Reports. Includes 11.1 Laptop Status Report (LARREPLG)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.

Software Release & Date	Document Number	Content Affected	Description of Change
2026 R1 November 2025	WBCGR2026R1_01	11.1 Collection Summary Report (DRRMREPS)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	11.3 Collection Summary Report by Recruiter (DRRCSREC)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	12.5 Unit Interdiction Report (MCRUINTR)	Updated the 'Generating the Report' and 'Sample Report' sections.
2026 R1 November 2025	WBCGR2026R1_01	13.10 Plasma Tube Reconciliation Report (CPRPTREC)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	13.11 Duplicate Gel Tube Packlist Report (GLRPKLST)	Removed from Guide. No longer Supported. Added to Appendix A - De-Supported Reports.
2026 R1 November 2025	WBCGR2026R1_01	14.1.7 Unscheduled Test Results Report (TSRUNSCH)	Updated the 'Generating the Report' and 'Sample Report' sections, and added the 'No Collection Date in Unscheduled' and 'Total at End of Report' sections.
2026 R1 November 2025	WBCGR2026R1_01	15.4 Unlabeled Components Detail Report (CPRUNLBL)	Updated the 'Generating the Report' and 'Sample Report' sections.
2026 R1 November 2025	WBCGR2026R1_01	Chapter 23 - Customer Administration Reports	Removed "Internal" from title and updated CUSADM screenshot.
2026 R1 November 2025	WBCGR2026R1_01	Appendix A - De-Supported Reports	In the Distribution section, added SARTIER and SARPRICE.

Contents

Chapter 1 - Introduction 1
1.1 Overview 2
1.2 In This Guide 2
1.3 Generating a Report 2
1.3.1 Purpose 2
1.3.2 Entering Data 2
1.3.3 In the Report Parameters Block 3
1.3.4 Entering Multiple Values for a Parameter 4
1.3.5 The Next Block 4
1.3.6 The Submit Button 4
1.3.7 What to Do Next 4
1.4 Viewing and Printing Reports (PRINT and SPRINT) 5
1.4.1 Intended Use 5
1.4.2 Limitations 5
1.4.3 Prerequisites 5
1.4.4 Accessing the Screen 5
1.4.5 Refreshing the Status Field 6
1.4.6 Searching for a Report 6
1.4.7 Selection Options 6
1.4.8 What to Do Next 8
1.5 Automatically Printing a Report 8
1.6 Instrument Reports (IPRINT) 8
Donor 10
Chapter 2 - Recruitment Reports 11
2.1 Drive Sheet Report (MRRDRVSH) 13
2.1.1 Intended Use 13
2.1.2 Accessing the Screen 13
2.1.3 Limitation 13
2.1.4 Generating the Report 13
2.1.5 Sample Report 14

2.1 Sponsor Profile Report (MRRSPALL) 15
2.1.1 Intended Use 15
2.1.2 Accessing the Screen 15
2.1.3 Generating the Report 15
2.1.4 Sample Report 16
2.2 Drive Production Report (MCRDPROD) 17
2.2.1 Intended Use 17
2.2.2 Accessing the Screen 17
2.2.3 Generating the Report 17
2.2.4 Sample Report 18
2.3 Temporary Drives Report (MRRTMPDR) 19
2.3.1 Intended Use 19
2.3.2 Accessing the Screen 19
2.3.3 Generating the Report 19
2.3.4 Sample Report 19
2.4 Cancelled Drives Report (MRRCANDR) 20
2.4.1 Intended Use 20
2.4.2 Accessing the Screen 20
2.4.3 Generating the Report 20
2.4.4 Sample Report 20
2.5 Collection Goals Report (MRRGOALS) 21
2.5.1 Intended Use 21
2.5.2 Accessing the Screen 21
2.5.3 Generating the Report 21
2.5.4 Sample Report 21
2.6 1st Time Donor by Date and Sponsor (DNRFSTDN) 22
2.6.1 Intended Use 22
2.6.2 Accessing the Screen 22
2.6.3 Generating the Report 22
2.6.4 Sample Report 22
2.7 Drive List by Date Range (DNRDRVDT) 23

WellSky Corporation
Proprietary and confidential

2.7.1 Intended Use 23
2.7.2 Accessing the Screen 23
2.7.3 Generating the Report 23
2.7.4 Sample Report 23
2.8 Donation Profile Report (DNRDONPF) 24
2.8.1 Intended Use 24
2.8.2 Accessing the Screen 24
2.8.3 Generating the Report 24
2.8.4 Sample Report 24
2.9 Donation Profile Details Report (DNRDPROF) 25
2.9.1 Intended Use 25
2.9.2 Accessing the Screen 25
2.9.3 Generating the Report 25
2.9.4 Sample Report 25
2.10 Donation History Report (DERDNHIS) 26
2.10.1 Intended Use 26
2.10.2 Accessing the Screen 26
2.10.3 Generating the Report 26
2.10.4 Sample Report 26
2.11 Participation Summary by Drive (MRRPARDR) 27
2.11.1 Intended Use 27
2.11.2 Accessing the Screen 27
2.11.3 Generating the Report 27
2.11.4 Sample Report 28
2.12 Percent Participation Summary Report (MRRSPNSM) 29
2.12.1 Intended Use 29
2.12.2 Accessing the Screen 29
2.12.3 Generating the Report 29
2.12.4 Sample Report 29
2.13 Participation Summary by Sponsor (MRRPARSP) 30
2.13.1 Intended Use 30

2.13.2 Accessing the Screen 30
2.13.3 Generating the Report 30
2.13.4 Sample Report: 31
2.14 Sponsor List (MRRBYLOB) 32
2.14.1 Intended Use 32
2.14.2 Accessing the Screen 32
2.14.3 Generating the Report 32
2.14.4 Sample Report 32
2.15 Track Return of 1st Time Donors (DNRFSTTK) 33
2.15.1 Intended Use 33
2.15.2 Accessing the Screen 33
2.15.3 Generating the Report 33
2.15.4 Sample Report 33
2.16 First Time Donor Summary (DNRFSTSM) 34
2.16.1 Intended Use 34
2.16.2 Accessing the Screen 34
2.16.3 Generating the Report 34
2.16.4 Sample Report 34
Chapter 3 - Post Drive Analysis Reports 35
3.1 Collection Summary Report by Drives (DRRCSDRV) 37
3.1.1 Intended Use 37
3.1.2 Accessing the Screen 37
3.1.3 Generating the Report 37
3.1.4 Sample Report 37
3.2 Coll Staff Documentation Errors (SSRDOCER) 38
3.2.1 Intended Use 38
3.2.2 Accessing the Screen 38
3.2.3 Generating the Report 38
3.2.4 Sample Report 38
Chapter 4 - Enlistment Reports 39
4.1 Donor List Report (DEIDNLST) 41

WellSky Corporation
Proprietary and confidential

4.1.1 Intended Use 41
4.1.2 Accessing the Screen 41
4.1.3 Generating the Report 41
4.1.4 Sample Report 41
4.2 Donor Label Printing By List ID (DONORLBL) 42
4.2.1 Intended Use 42
4.2.2 Accessing the Screen 42
4.2.3 Generating the Report 42
4.2.4 Sample Report 42
Chapter 5 - Donor Center Management Reports 45
5.1 Collection Summary Report by Fixed Sites (DRRCSFXS) 47
5.1.1 Intended Use 47
5.1.2 Accessing the Screen 47
5.1.3 Generating the Report 47
5.1.4 Sample Report 47
5.2 Donor Schedule Report (SSROUTIM) 48
5.2.1 Intended Use 48
5.2.2 Accessing the Screen 48
5.2.3 Generating the Report 48
5.2.4 Sample Report 48
5.3 Donor Center Production Report (DNRAPPRD) 49
5.3.1 Intended Use 49
5.3.2 Accessing the Screen 49
5.3.3 Generating the Report 49
5.3.4 Sample Report 49
5.4 Donor Schedule Detail Report (DSRDOALL) 50
5.4.1 Intended Use 50
5.4.2 Accessing the Screen 50
5.4.3 Generating the Report 50
5.4.4 Sample Report 50
5.5 Deferrals by Date Range by Site (DFBYSITE) 51

Chapter 6 - Registration Reports 53
6.1 Donation Registration Batch (DRRDNBAT) 55
6.1.1 Intended Use 55
6.1.2 Accessing the Screen 55
6.1.3 Generating the Report 55
6.1.4 Sample Report 55
6.2 Deferral Registration Batch (DRRDFBAT) 56
6.2.1 Intended Use 56
6.2.2 Accessing the Screen 56
6.2.3 Generating the Report 56
6.2.4 Sample Report 56
6.3 Donations by HOLD Code (DRRHLDDT) 57
6.3.1 Intended Use 57
6.3.2 Accessing the Screen 57
6.3.3 Generating the Report 57
6.3.4 Sample Report 57
6.4 Registration Summary Report (DRRSUMDT) 58
6.4.1 Intended Use 58
6.4.2 Accessing the Screen 58
6.4.3 Generating the Report 58
6.4.4 Sample Report 59
6.5 Deferrals Pending Audit Report (DRRDNADT) 60
6.5.1 Intended Use 60
6.5.2 Accessing the Screen 60
6.5.3 Generating the Report 60
6.5.4 Sample Report 60
6.6 Units Pending Audit Report (DRRUNADT) 61
6.6.1 Intended Use 61
6.6.2 Accessing the Screen 61
6.6.3 Generating the Report 61
6.6.4 Sample Report 61

WellSky Corporation
Proprietary and confidential

6.7 Deferrals with no Donor Attached (DNRDFNDO) 62
6.7.1 Intended Use 62
6.7.2 Accessing the Screen 62
6.7.3 Generating the Report 62
6.7.4 Sample Report 62
6.8 Donations with no Donor Attached (DNRDNNDO) 63
6.8.1 Intended Use 63
6.8.2 Accessing the Screen 63
6.8.3 Generating the Report 63
6.8.4 Sample Report 63
6.9 Deferrals Pending Audit Report by Date (DNRDNADT) 64
6.9.1 Intended Use 64
6.9.2 Accessing the Screen 64
6.9.3 Generating the Report 64
6.9.4 Sample Report 64
6.10 Donation Pending Audit Report by Date (DNRUNADT) 65
6.10.1 Intended Use 65
6.10.2 Accessing the Screen 65
6.10.3 Generating the Report 65
6.10.4 Sample Report 65
6.11 Units by Inter Code and Donation Type (DNRUTINT) 66
6.11.1 Intended Use 66
6.11.2 Accessing the Screen 66
6.11.3 Generating the Report 66
6.11.4 Sample Report 66
6.12 Audit Reconciliation Report (DNRAURCN) 67
6.12.1 Intended Use 67
6.12.2 Accessing the Screen 67
6.12.3 Generating the Report 67
6.12.4 Sample Report 67
Chapter 7 - Donor Profile Reports 69

7.1 Duplicate Donor Merge Report (DPRMERGE) 71
7.1.1 Intended Use 71
7.1.2 Accessing the Screen 71
7.1.3 Generating the Report 71
7.1.4 Sample Report 71
7.2 Donor Profile Report (DNRPROFL) 72
7.2.1 Intended Use 72
7.2.2 Accessing the Screen 72
7.2.3 Generating the Report 72
7.2.4 Sample Report 72
7.3 Donor Unusual Changes to Key Fields (DNRUNCHG) 73
7.3.1 Intended Use 73
7.3.2 Accessing the Screen 73
7.3.3 Generating the Report 73
7.3.4 Sample Report 73
7.4 Donor Profile Report – Details (DPRPRFLD) 74
7.4.1 Intended Use 74
7.4.2 Accessing the Screen 74
7.4.3 Generating the Report 74
7.4.4 Sample Report 74
7.5 Duplicate Batches Pending Resolution (DPRPENDG) 75
7.5.1 Intended Use 75
7.5.2 Accessing the Screen 75
7.5.3 Generating the Report 75
7.5.4 Sample Report 75
7.6 Duplicate Batches Pending Merge/False (DPRRESOL) 76
7.6.1 Intended Use 76
7.6.2 Accessing the Screen 76
7.6.3 Generating the Report 76
7.6.4 Sample Report 76
7.7 Donors by Donation Type and Coll Date (DONREPCL) 77

WellSky Corporation
Proprietary and confidential

7.7.1 Intended Use 77
7.7.2 Accessing the Screen 77
7.7.3 Generating the Report 77
7.7.4 Sample Report 77
7.8 Donation by Coll Date/Proc/Don Type (DNRPRDON) 78
7.8.1 Intended Use 78
7.8.2 Accessing the Screen 78
7.8.3 Generating the Report 78
7.8.4 Sample Report 78
7.9 Deferrals by Deferral Reason (DNRQNSDF) 79
7.9.1 Intended Use 79
7.9.2 Accessing the Screen 79
7.9.3 Generating the Report 79
7.9.4 Sample Report 80
7.10 Donor Details Report (DPRDONDT) 81
7.10.1 Intended Use 81
7.10.2 Accessing the Screen 81
7.10.3 Generating the Report 81
7.10.4 Sample Report 81
7.11 Donor Details Report (Multiple Donors) (DPRDOND2) 83
7.11.1 Intended Use 83
7.11.2 Accessing the Screen 83
7.11.3 Generating the Report 83
7.11.4 Sample Report 83
7.12 Blood Donor Record (BDR) 84
7.12.1 Intended Use 84
7.12.2 Accessing the Screen 84
7.12.3 Generating the Report 84
7.12.4 Sample Record 85
Chapter 8 - HLA/RBC Reports 89
8.1 HLA/RBC Request – Donors/Units (HRRDONOR) 91

8.1.1 Intended Use 91
8.1.2 Accessing the Screen 91
8.1.3 Generating the Report 91
8.1.4 Sample Report 91
Chapter 9 - Notification Reports 93
9.1 Interdictions Caused by Testing (DPRIBDTR) 95
9.1.1 Intended Use 95
9.1.2 Accessing the Screen 95
9.1.3 Generating the Report 95
9.1.4 Sample Report 96
9.2 Interdictions by Date Range (DPRINTER) 97
9.2.1 Intended Use 97
9.2.2 Accessing the Screen 97
9.2.3 Generating the Report 97
9.2.4 Sample Report 98
9.3 View Letter Templates (VDRVWLT2) 99
9.3.1 Intended Use 99
9.3.2 Accessing the Screen 99
9.3.3 Generating the Report 99
9.3.4 Sample Report 100
Chapter 10 - Donor Communication Reports 101
10.1 Donor Communications Report (DCRDNCOM) 103
10.1.1 Intended Use 103
10.1.2 Accessing the Screen 103
10.1.3 Generating the Report 103
10.1.4 Sample Report 103
Lab 103
Chapter 11 - Material Check-In Reports 105
11.1 Check-In Detail Report – By Batch (MCRBATD) 107
11.1.1 Intended Use 107
11.1.2 Accessing the Screen 107

WellSky Corporation
Proprietary and confidential

11.1.3 Generating the Report 107
11.1.4 Sample Report 107
11.2 Check-in Detail Report – By Coll Date (MCRCOLD) 108
11.2.1 Intended Use 108
11.2.2 Accessing the Screen 108
11.2.3 Generating the Report 108
11.2.4 Sample Report 109
11.3 Unit Attributes Report (MCRUATTR) 110
11.3.1 Intended Use 110
11.3.2 Accessing the Screen 110
11.3.3 Generating the Report 110
11.3.4 Sample Report 111
11.4 Units Rejected Report (MCRUREJT) 112
11.4.1 Intended Use 112
11.4.2 Accessing the Screen 112
11.4.3 Generating the Report 112
11.4.4 Sample Report 112
11.5 Unit Interdiction Report (MCRUINTR) 113
11.5.1 Intended Use 113
11.5.2 Accessing the Screen 113
11.5.3 Generating the Report 113
11.5.4 Sample Report 114
11.6 Units Pending Separation Report (MCRUNSEP) 116
11.6.1 Intended Use 116
11.6.2 Accessing the Screen 116
11.6.3 Generating the Report 116
11.6.4 Sample Report 117
11.7 Samples Pack List (MCRNATPK) 118
11.7.1 Intended Use 118
11.7.2 Accessing the Screen 118
11.7.3 Generating the Report 118

11.7.4 Sample Report 119
11.8 Sample Packing Sequence Report (MCRNATBX) 120
11.8.1 Intended Use 120
11.8.2 Accessing the Screen 120
11.8.3 Generating the Report 120
11.8.4 Sample Report 120
11.9 Transfer Slip Re-Print (CPRCKOSL) 121
11.9.1 Intended Use 121
11.9.2 Accessing the Screen 121
11.9.3 Generating the Report 121
11.9.4 Sample Report 121
Chapter 12 - Components Reports 123
12.1 Component Production Detail by Batch (CPRPRODB) 125
12.1.1 Intended Use 125
12.1.2 Accessing the Screen 125
12.1.3 Generating the Report 125
12.1.4 Sample Report 125
12.2 Component Prod. Detail by Date/Time (CPRPROD) 126
12.2.1 Intended Use 126
12.2.2 Accessing the Screen 126
12.2.3 Generating the Report 126
12.2.4 Sample Report 127
12.3 Component Production Summary Report (CPRPRSUM) 128
12.3.1 Intended Use 128
12.3.2 Accessing the Screen 128
12.3.3 Generating the Report 128
12.3.4 Sample Report 129
12.4 Pheresis Detail Report (CPRPPCNT) 130
12.4.1 Intended Use 130
12.4.2 Accessing the Screen 130
12.4.3 Generating the Report 130

WellSky Corporation
Proprietary and confidential

12.4.4 Sample Report 131
12.5 Component Quarantine Report (CPRTOHLD) 132
12.5.1 Intended Use 132
12.5.2 Accessing the Screen 132
12.5.3 Generating the Report 132
12.5.4 Sample Report 133
12.6 Component Discard Report (CPRTOREJ) 134
12.6.1 Intended Use 134
12.6.2 Accessing the Screen 134
12.6.3 Generating the Report 134
12.6.4 Sample Report 135
12.7 Components Rejected Detail Report (CPRINREJ) 136
12.7.1 Intended Use 136
12.7.2 Accessing the Screen 136
12.7.3 Generating the Report 136
12.7.4 Sample Report 137
12.8 Components Rejected Summary Report (CPRLAREJ) 138
12.8.1 Intended Use 138
12.8.2 Accessing the Screen 138
12.8.3 Generating the Report 138
12.8.4 Sample Report 138
12.9 Component Interdiction Report (CPRCOINT) 139
12.9.1 Intended Use 139
12.9.2 Accessing the Screen 139
12.9.3 Generating the Report 139
12.9.4 Sample Report 140
12.10 Bag to Component Reconciliation Report (CPRBAGCF) 141
12.10.1 Intended Use 141
12.10.2 Accessing the Screen 141
12.10.3 Generating the Report 141
12.10.4 Sample Report 142

12.11 CRYO Processing Details Report (CPRCRYO) 143
12.11.1 Intended Use 143
12.11.2 Accessing the Screen 143
12.11.3 Generating the Report 143
12.11.4 Sample Report 143
12.12 Components Suitable for FFP Conversion (CPRABOFR) 144
12.12.1 Intended Use 144
12.12.2 Limitations 144
12.12.3 Accessing the Screen 144
12.12.4 Generating the Report 144
12.12.5 Sample Report 145
12.13 Component Conversion Report (CPRCOCON) 146
12.13.1 Intended Use 146
12.13.2 Accessing the Screen 146
12.13.3 Generating the Report 146
12.13.4 Sample Report 146
12.14 Separation Done – Component Not Defined (CPRSEPUC) 147
12.14.1 Intended Use 147
12.14.2 Accessing the Screen 147
12.14.3 Generating the Report 147
12.14.4 Sample Report 148
12.15 Components Not Weighed Report (CPRCOWGT) 149
12.15.1 Intended Use 149
12.15.2 Accessing the Screen 149
12.15.3 Generating the Report 149
12.15.4 Sample Report 150
12.16 Pooled Components Report (CPRPOOL) 151
12.16.1 Intended Use 151
12.16.2 Accessing the Screen 151
12.16.3 Generating the Report 151
12.16.4 Sample Report 151

12.17 Discard Product Detail Report (CPRDISCD) 152
12.17.1 Intended Use 152
12.17.2 Accessing the Screen 152
12.17.3 Generating the Report 152
12.17.4 Sample Report 152
Chapter 13 - Testing Reports 157
13.1 Testing Reports by Collection Date 160
13.1.1 Units to be Tested Report (TSRUNTST) 160
13.1.2 Test Status Report (TSRRSTAT) 161
13.1.3 Initially Reactive Report (TSRINITR) 164
13.1.4 Initially Reactive/Repeat Non-Reactive (TSRREPTN) 165
13.1.5 Repeatedly Reactive Report (TSRREPTR) 166
13.1.6 Result Discrepancy Report (TERABDES) 168
13.1.7 Unscheduled Test Results Report (TSRUNSCH) 169
13.1.8 Patient/Hospital Testing Results Report (TSRINTRP) 171
13.1.9 Pat/Hosp Testing Repeat Results Report (TSRINTRR) 172
13.1.10 Prior Antigen Results Report (TSRANTGN) 173
13.1.11 Test Result Detail With OD/Ratio Report (TSRRDETL) 174
13.1.12 Summary of Tests Performed by a Client (TSRTSMRY) 176
13.1.13 Units with Incomplete Profile Tests (TSRUNPRF) 177
13.1.14 CMV to be Tested Report (TSRUNCMV) 178
13.1.15 Monthly Reactive Rate Report (MCRMONRT) 178
13.1.16 Test Profile by Contract Report (MCRTPROF) 180
13.2 Testing Reports by Receive Date 182
13.2.1 Initially Reactive by Receive Date (TSRINIT2) 182
13.2.2 Repeatedly Reactive by Receive Date (TSRRPTR) 183
13.2.3 ABO/RH Spread by Receive Date (GERSPRD2) 185
13.2.4 Test Result Spread by Receive Date (TERSPRD2) 186
13.2.5 Test Result Status by Receive Date (TSRRSTA2) 187
13.2.6 CMV to be Tested by Receive Date (TSRUNCM2) 189
13.2.7 Unscheduled Test Results by Receive Date (TSRUNSC2) 190

13.2.8 Units to be Tested by Receive Date (TSRUNTS2) 192
13.2.9 Lists of Tested Units by Contract (TSRRLIST) 193
13.2.10 (IR) Repeat NonReactive by Receive Date (TSRREPT2) 194
13.2.11 Test Result Detail With OD/Ratio by Receive Date (TSRRDET2) 196
13.2.12 Test Voids Report (TERVOID) 197
13.2.13 Tests Performed Summary Report (TSRTESMR) 199
13.2.14 Repeatedly Reactive Detail with OD/Ratio (TSRRODC) 200
13.2.15 Incomplete Profile Testing by Receive Date (TSRUNPR2) 202
13.2.16 Unit Interdiction by Receive Date (MCRUINT2) 203
13.2.17 Repeat Reactive Details Report (TSRREPTD) 205
Chapter 14 - Labeling Reports 207
14.1 Label Status Summary Report (TELABSTS) 209
14.1.1 Intended Use 209
14.1.2 Accessing the Screen 209
14.1.3 Generating the Report 209
14.1.4 Sample Report 210
14.2 Labeled Product Summary by Labeler Report (CPRLAUSU) 211
14.2.1 Intended Use 211
14.2.2 Accessing the Screen 211
14.2.3 Generating the Report 211
14.2.4 Sample Report 211
14.3 Labeling Reconciliation Report (CPRLACTC) 212
14.3.1 Intended Use 212
14.3.2 Accessing the Screen 212
14.3.3 Generating the Report 212
14.3.4 Sample Report 213
14.4 Unlabeled Components Detail Report (CPRUNLBL) 214
14.4.1 Intended Use 214
14.4.2 Accessing the Screen 214
14.4.3 Generating the Report 214
14.4.4 Sample Report 215

WellSky Corporation
Proprietary and confidential

14.5 Components Labeled as HOLD Report (CPRLHOLD) 218
14.5.1 Intended Use 218
14.5.2 Accessing the Screen 218
14.5.3 Generating the Report 218
14.5.4 Sample Report 218
14.6 Label Override Detail Report (CPRCOCPL) 219
14.6.1 Intended Use 219
14.6.2 Accessing the Screen 219
14.6.3 Generating the Report 219
14.6.4 Sample Report 219
Chapter 15 - Imported Products Reports 221
15.1 Imported Products Received Report (IMRECVD) 223
15.1.1 Intended Use 223
15.1.2 Limitations 223
15.1.3 Accessing the Screen 223
15.1.4 Generating the Report 223
15.1.5 Sample Report 224
Chapter 16 - Unit Reports 225
16.1 Current Unit Information Report (GERUINFO) 227
16.1.1 Intended Use 227
16.1.2 Accessing the Screen 227
16.1.3 Generating the Report 227
16.1.4 Sample Report 228
16.2 Unit Audit Information Report (GERAUDIT) 229
16.2.1 Intended Use 229
16.2.2 Limitations 229
16.2.3 Accessing the Screen 229
16.2.4 Generating the Report 229
16.2.5 Sample Report 230
16.3 Interdiction History by Unit ID (GERUNIHS) 231
16.3.1 Intended Use 231

16.3.2 Accessing the Screen 231
16.3.3 Generating the Report 231
16.3.4 Sample Report 231
16.4 Interdiction History by User/Date (GERINUHS) 232
16.4.1 Intended Use 232
16.4.2 Accessing the Screen 232
16.4.3 Generating the Report 232
16.4.4 Sample Report 233
16.5 Reconciliation of AUTO and BIO Products (CPRATBIO) 234
16.5.1 Intended Use 234
16.5.2 Accessing the Screen 234
16.5.3 Generating the Report 234
16.5.4 Sample Report 235
16.6 BIO Unit Reconciliation Report (CPRREBIO) 237
16.6.1 Intended Use 237
16.6.2 Accessing the Screen 237
16.6.3 Generating the Report 237
16.6.4 Sample Report 238
16.7 Unit Notes (GERUNOTE) 239
16.7.1 Intended Use 239
16.7.2 Accessing the Screen 239
16.7.3 Generating the Report 239
16.7.4 Sample Report 240
Chapter 17 - Regional Sample Tracking Reports 241
17.1 Tubes Check-In Report (RGRTUBES) 243
17.1.1 Intended Use 243
17.1.2 Accessing the Screen 243
17.1.3 Generating the Report 243
17.1.4 Sample Report 244

1.1 Overview

As a donor center management system, WellSky Blood Centers assists in the registration of the donor, the processing of the blood unit, and final disposition of the unit by maintaining all data relating to each unit. In order to do so, the system has been broken down into distinct modules so that the different kinds of data can be easily accounted for.

The Blood Centers reports generated by this system are described in this guide. These reports have been provided in order to help you in verifying and reconciling data entered in the system. In addition, many reports assist supervisors in identifying productivity trends and determining where supplemental training for users is required.

To review or print a report, it must first be generated using a report screen. Each report screen requires that parameters be set in order to search the database for information. These parameters are listed in this document along with the purpose of each report and when each report screen is to be used.

1.2 In This Guide

For each report, the WellSky Blood Centers Reports Guide details its purpose and parameters, as well as the report content and in what cases it is used. These report descriptions are followed by sample reports that illustrate column headings and, in most cases, sample data.

1.3 Generating a Report

1.3.1 Purpose

Most Blood Centers modules have a menu devoted to generating reports. These report screens prompt the user to enter necessary parameter values, which the system uses when it searches the database. The parameter values act as pointers and tell the system where to find the required data.

For some parameters, the user can enter more than one value. For instance, when generating a group/site summary report, the user can enter more than one group/site ID. This document indicates for each screen if this option is available.

After the report is generated using a report screen, it can then be reviewed on-line or printed out using the User Report Actions screen or the Supervisory Report Actions screen. These screens list all the reports that are available for your review.

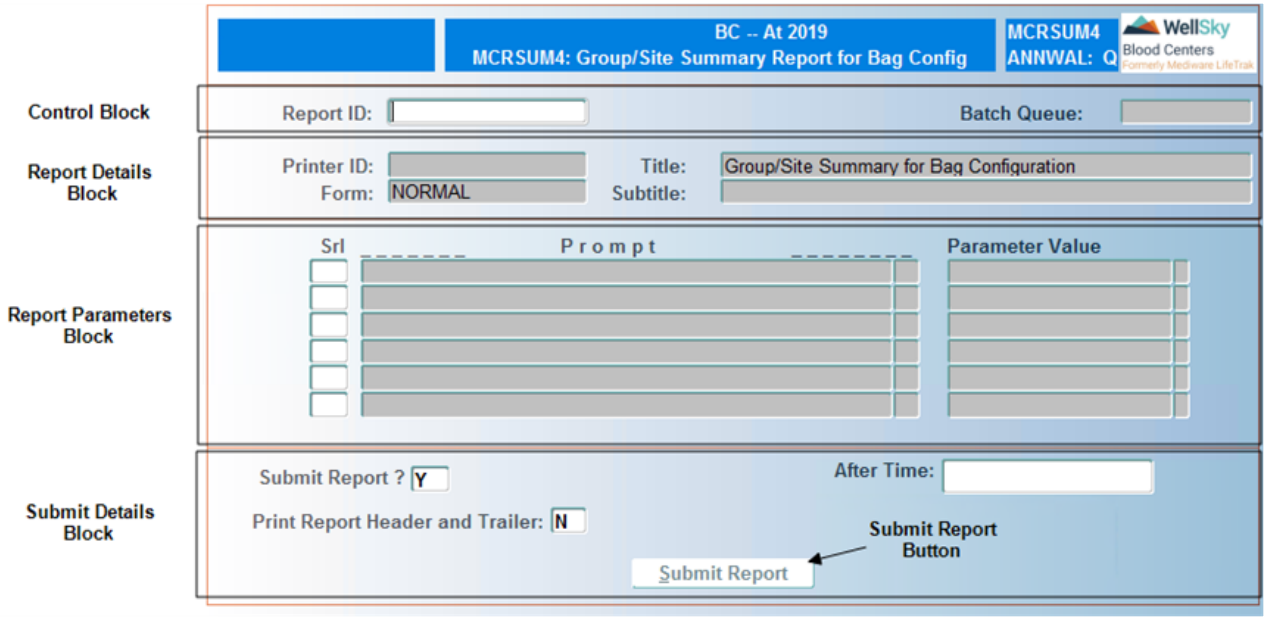

NOTE – For any report that requires ISBT unit ID (DIN) as a parameter value, do not enter its associated checksum (check digit). Entering the checksum will result in a blank report.

1.3.2 Entering Data

Report screens are accessed from the report menus in each of the modules. Below is a sample report screen.

WellSky Corporation
Proprietary and confidential

In order to generate a report, the user must enter required data and parameter values in the Control Block:

Report ID

Entry is required. The system will automatically generate the report ID when you type **NEW** in the field or press ENTER to move out of the field. The report ID generated with USER ID + DATE + system-generated number.

To re-print a report, open the LOV and select the report ID to continue.

NOTE – Database sequence is created as part of the setup process (install script), and it is created under 'util' user. The application user is not allowed to change it. Sequence is not chapter-specific. Whenever the sequence is called, it generates the next number. For example, the current number of the sequence is 350. When the sequence is called, it increments by 1 and assigns 351. If it is called again, it assigns 352. Duplicate numbers do not happen because the database always gives a unique number (next in sequence) when invoked.

Batch Queue

Field is disabled for most reports. Do not enter any data.

After entering the required data in the Control Block, press TAB or ENTER to move to the Parameter Values section of the Report Parameters Block.

1.3.3 In the Report Parameters Block

The Prompt field in the Report Parameters block describes the required values. Enter the first required parameter value into the Parameter Values section of the Report Parameters block, then press the DOWN key. If an LOV is available for the parameter, press F2 (List of Values), use the UP and DOWN keys to select the desired value, then press F12 (Commit). Continue entering parameter values until all are entered.

1.3.4 Entering Multiple Values for a Parameter

Some of the parameters allow multiple values. To enter a multiple value, press the [Enter] key instead of the down arrow. The cursor moves to the next space in the Parameter Values section of the Report Parameters Block.

If you press ENTER for a parameter that does not allow multiple values, the hint line at the bottom of the screen displays a message to alert you that you are not allowed to enter multiple values for that parameter:

NOTE – This document notes which parameters allow multiple values.

1.3.5 The Next Block

After entering all parameter values, press the CTRL + F3 (Next Block) key to move to the Submit Details block. The cursor moves to the Submit Report field.

Submit Report

Entry is required. Default is Y (Yes) to generate the report; or enter N (No) to abort the report.

Print Report Header and Trailer

Entry is required. Default is N (No) to not print a header and trailer if the report is printed; or enter Y (Yes) to create a cover page for the report.

After Time

Entry is optional. To submit a report at a later time, enter the date and time, using the MM-DD-YYYY HH:MI format. This is especially useful when submitting a report within a given date range to minimally impact resources on the system. It is also used to have reports ready for work to be done overnight or a weekend.

1.3.6 The Submit Button

After entering the required and desired optional data in the Submit Details block, click Submit to submit the report. A message confirms that the report is submitted:

Click OK to return to the report screen.

1.3.7 What to Do Next

Review the report by using the User Report Actions (PRINT) screen or the Supervisory Report Actions (SPRINT) screen.

WellSky Corporation
Proprietary and confidential

1.4 Viewing and Printing Reports (PRINT and SPRINT)

1.4.1 Intended Use

Use the Report Actions - User (PRINT) screen or the Report Actions - Supervisor (SPRINT) screen to review or delete a report. The user mode allows you to access reports you generated. The supervisory mode allows you to access reports generated by other users within your same functional group.

1.4.2 Limitations

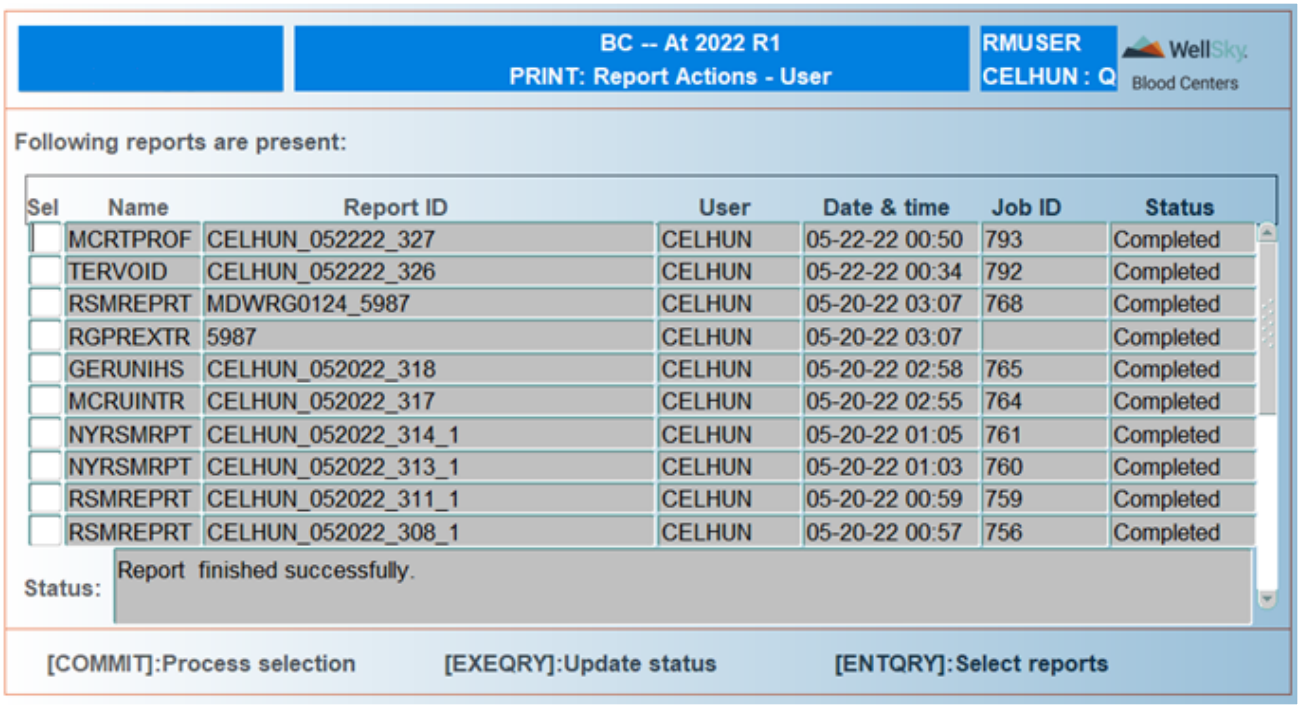

You must have supervisory access to use the Report Actions - Supervisor (SPRINT) screen.

1.4.3 Prerequisites

You must have generated reports already.

1.4.4 Accessing the Screen

Access these screens from the User Utilities menu or by entering the keywords PRINT or SPRINT.

NOTE – The User column is present in both Print and SPRINT. In the PRINT screen the User column displays the ID of the user who is submitting reports. In the SPRINT screen, the User column displays all user IDs for all users who have submitted reports.

1.4.5 Refreshing the Status Field

If a report is not complete, press ALT + F12 (Execute Query) to update the status.

System Parameter PRINTTIMER can be defined with number of seconds to automatically refresh the page.

NOTE – In order to review a report, the report status must show as *Completed* in the Status column.

1.4.6 Searching for a Report

If the list of reports is long, you can search for specific criteria by following these procedures:

1. Press CTRL + F12 (Enter Query) to select reports.
2. Tab to the field you wish to search by.
3. Enter a value.
4. Press ALT + F12 (Execute Query) to execute your search.

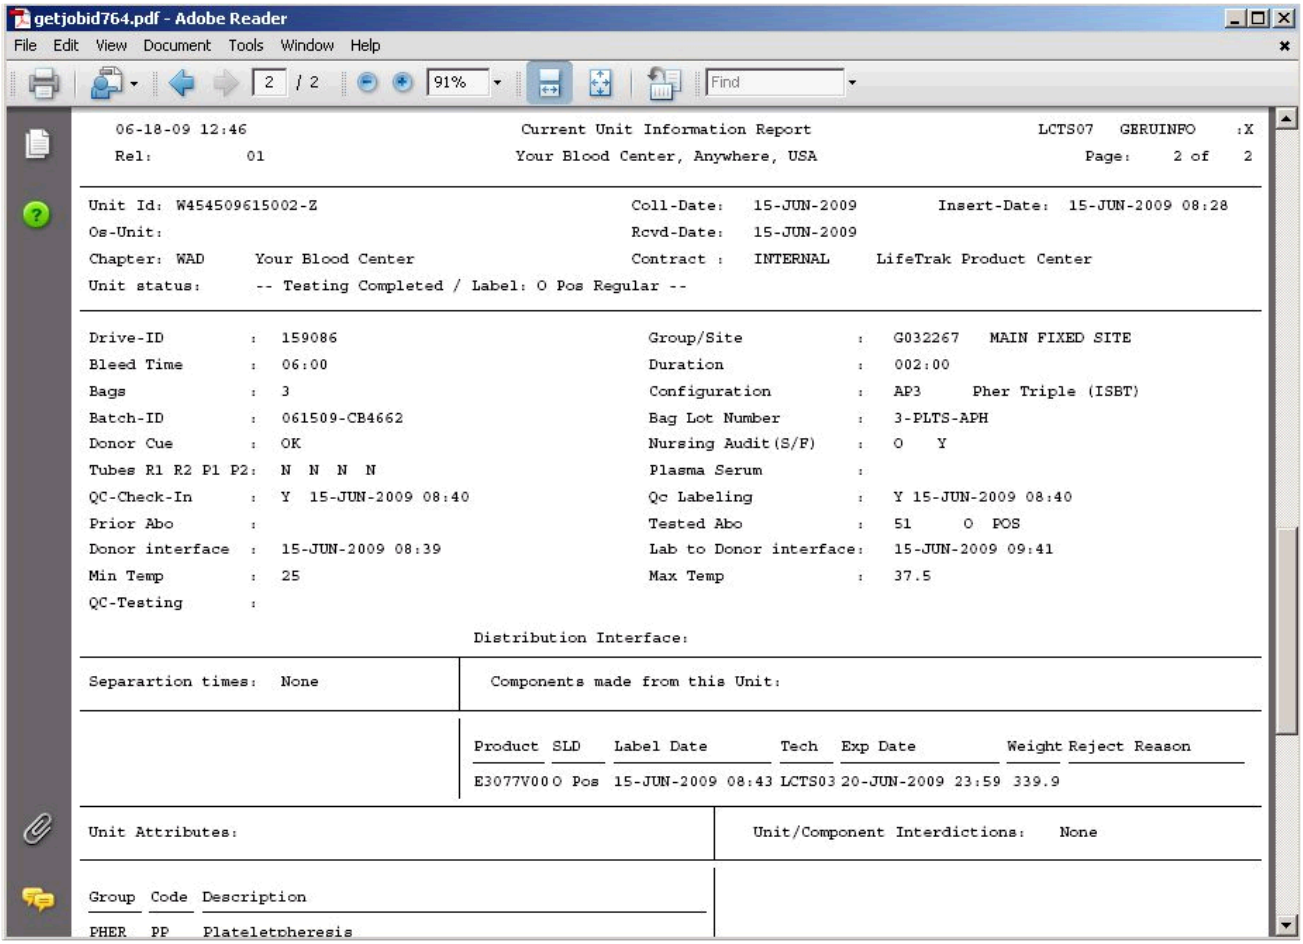

1.4.7 Selection Options

You may either review a report or delete a report. Select the report you want to view or delete and enter either R (Review) or D (Delete) in the Selection field. Press F12 (Commit) to process your request.

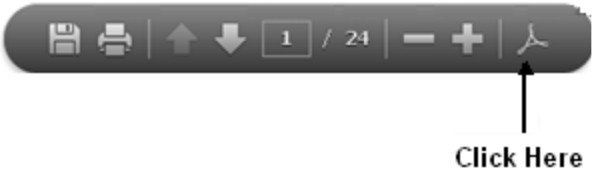

Review

Use this option to display the report (created in a .pdf format).

WellSky Corporation
Proprietary and confidential

The report will open in Adobe Reader. If you are using Adobe Reader X, the file may open in read-only mode, in which case the toolbars at the top of the screen will not display. To display the toolbars for the report currently displayed, click the following icon at the bottom of the screen:

The toolbars will display for the report currently being reviewed. The next time you open a report for review, the toolbars will not display.

If you want to display the toolbars for all reports you open in the future, you must change the Adobe Reader X setting so that it does not open in read-only mode. To do this, do the following:

1. Open Adobe Reader X.
2. Select **Edit -> Preferences**.
3. Select **Internet** under Categories.

4. Clear the *Display in Read Mode by default* check box.
5. Click **OK**.

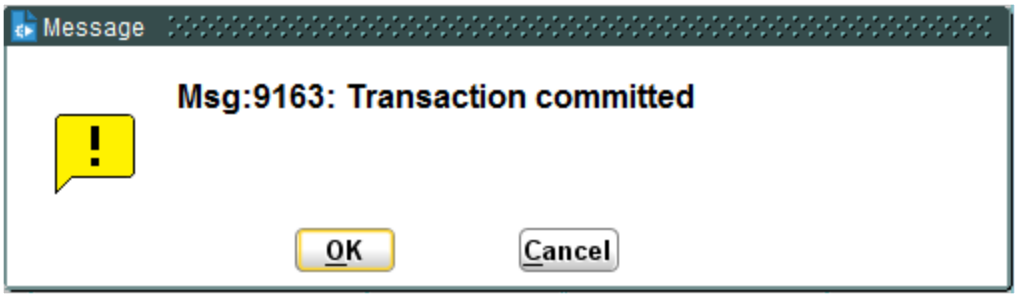

The next time you review a report, the toolbars will display at the top of the screen.

Once displayed, all normal Adobe Reader functions (search, zoom, print, etc) are available.

NOTE – Any generated report can be reviewed at any time and as often as needed by using the PRINT function. Alternatively, a report that is currently being displayed in Adobe Reader can be saved to the local (generally C:) drive. Once saved, this report is available for viewing at any time.

Delete

Use this option to delete a report from the Available Reports list. After making the report selections, press **F12** (Commit) to delete the report. The following pop-up confirms the action:

Click **OK** to return to the main window. The screen is cleared of selected actions and deleted reports are no longer listed.

1.4.8 What to Do Next

There is no next step.

1.5 Automatically Printing a Report

If your system is configured for automatic report printing, certain reports will be automatically printed to your specified network printer. You will not need to print them using PRINT or SPRINT. The reports will also be available for printing using PRINT or SPIRNT if you need to print them more than once.

The specific reports that print automatically are set up during the installation of the Blood Centers system. The network printer where the reports will print is set up by your system administrator.

1.6 Instrument Reports (IPRINT)

Instrument Reports automatically print when data is entered. However, if you with to reprint a report, use the Instrument Reports (IPRINT) screen to access recent reports and reprint or review them online. The commands for this screen are the same as those for the User Report Actions (PRINT) screen and the Supervisory Report Actions (SPRINT) screen.

Solution Life Cycle

The WellSky® Solution Life Cycle describes the sequence of phases our solutions go through from General Availability (GA) through maturity and decline. The value of identifying the phases and applying timeframes, i.e. actual dates to each phase, allows you to plan your upgrades and migrations without any gaps in support.

To help realize the maximum value from WellSky's applications, customers should install the latest version of your WellSky solution. The latest versions allow customer(s) to benefit from the latest functionality and feature enhancements, are designed to handle modern workloads, and provide access to our most complete technical support and engineering assistance and resources.

WellSky strives to make each version easier to upgrade, and we also have a professional services team to assist with upgrade plans as well. WellSky understands that business constraints may delay customers from upgrading, and that certain customers may need to have the flexibility either to upgrade to new versions or decide to remain on an older version for a while longer. WellSky, at its discretion, may provide customers with additional support offerings that can extend certain limited features of maintenance/support coverage until the customer is able to upgrade.

Milestone	Estimated Schedules
Major Release	Every two (2) years, at a minimum
Minor Release	At least one during the life cycle
Service Packs	One (1) – two (2) per life cycle, according to need during the life cycle

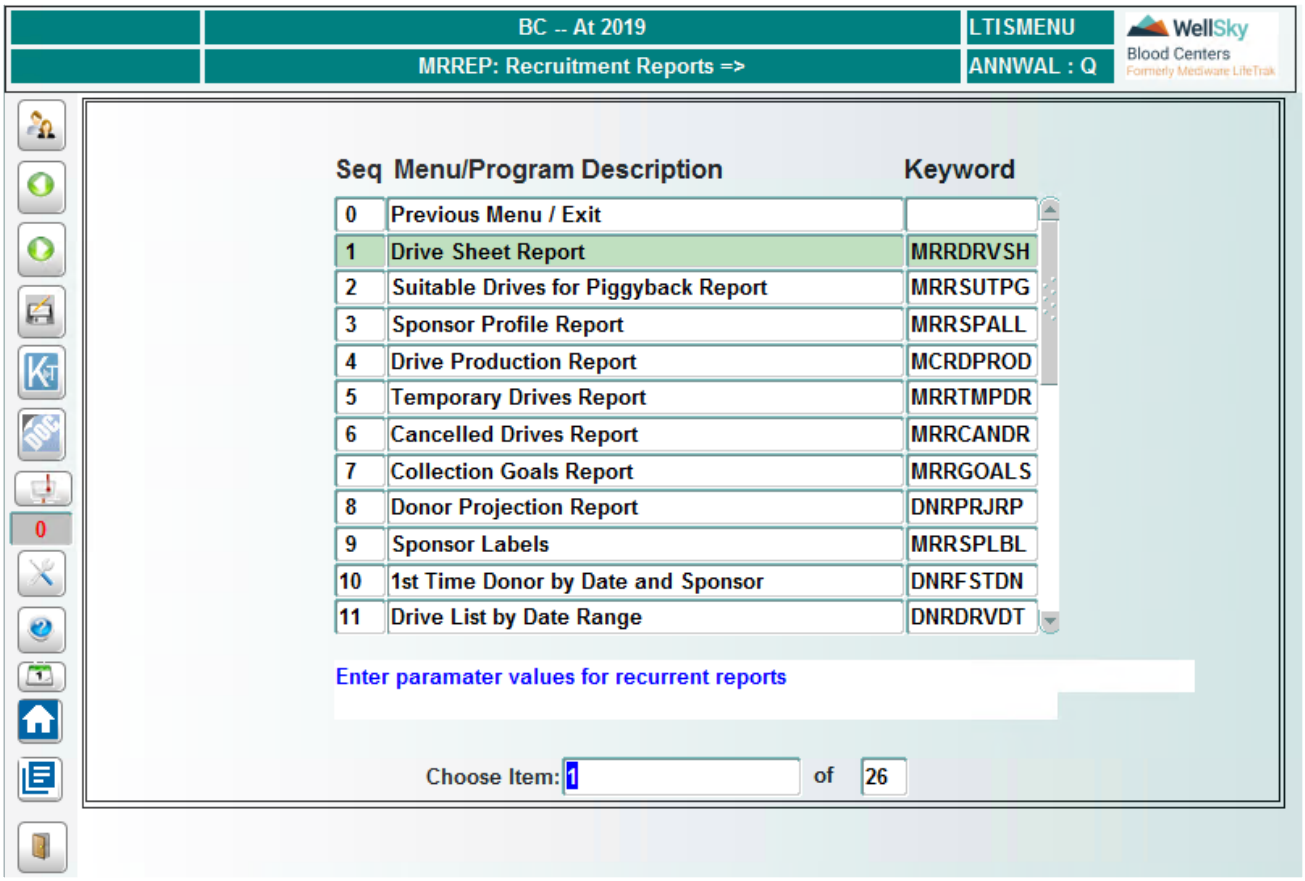

Primary Phase
Major Release
General Availability (GA)
Two (2) year period
Complete level of support
Minor Releases
Service Packs
Contains product enhancements and corrections to existing features, as needed.
Extended Phase
End of Primary Phase
No longer available for sale
Not under active development
One (1) to two (2) year period at sole discretion of WellSky.
Sustaining Phase
End of Extended Phase
Not available for sale
Not under active development
One (1) year period at WellSky Discretion.
Extension of Sustaining phase on a case by case basis, at WellSky Sole discretion and approval.
End of Life (EOL)
End of Sustaining Phase
Not available for Sale or upgrade
Customer notifications
Limited support services on a case by case basis, at WellSky sole discretion and approval.

7.12 Blood Donor Record (BDR)

7.12.1 Intended Use

This report is generated through the .net On-Site module (only) when the donation/deferral is completed. The report is saved in a specified directory based on system parameter in a .pdf format.

7.12.2 Accessing the Screen

This report is not accessed through the application. The user must have access to the network directory where the report will be saved.

7.12.3 Generating the Report

This report is generated automatically when the donation/deferral process is completed in the On-Site module (.net) only.

NOTE – The report will be saved as a PDF document into the specified directory that is defined in system parameter BDRLOC. This report will display in the Report Actions (PRINT) forms.

Donor Consents:
==========

Consent:DCONPP Signature Date:01-27-2020
Donor,

I understand that Blood donation for a Platelet Pheresis is a totally voluntary act and no inducement or remuneration has been offered. Donation of Blood/components is a medical procedure and that by donating voluntarily. I accept the risks associated with this procedure. My blood will be tested for Hepatitis B/C, Malaria parasite, HIV/AIDS and venereal diseases in addition to any other screening tests required to ensure blood safety. I prohibit any information provided by me or about my donation to be disclosed to any individual or government agency without any prior permission.

11.5 Unit Interdiction Report (MCRUINTR)

11.5.1 Intended Use

Use this screen to generate a report that gives details on all donations with interdictions within a specified date range, such as unit IDs, batch IDs, pheresis donation codes, and descriptions. Use this report to identify units/components in the system with associated interdictions. This report can also be used in quarantine reconciliation, especially for those units having interdictions other than testing.

11.5.2 Accessing the Screen

Access this screen from the Check-In Reports menu or by entering the keyword `MCRUINTR`.

11.5.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	No	Enter your 3 character Chapter ID If entering multiple chapters, each chapter will start on a new page.
Enter Warehouse ID	Yes	No	Defaults to ALL, but allowed to enter specific warehouse ID, or enter multiple IDs.
Enter From Collection Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format.
Enter To Collection Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format.
Enter Interdiction Code	Yes	Yes	N/A.
B-BIO, H-HOLD, I-Initial, N-NFT, or ALL	Yes	No	Entry of ALL will automatically default.

When generating the report, use the following parameters:

- Chapter ID – you must know the chapter IDs; there is not a list of values. Enter the first value and then press ENTER to move to the next line to enter the next chapter. If you want to run the report for ALL chapters, enter **ALL** (this is all chapters for the facility). The report does not check the user's logged-in access to chapters.
- Warehouse ID – you must enter the warehouse IDs. Enter the first value and then press ENTER to move to the next line to enter the next warehouse. If you want to run the report for ALL warehouses for the specified chapter, enter **ALL** (this is all warehouses for the facility). The report does not check for the user's logged-in access to the warehouses.

11.6 Units Pending Separation Report (MCRUNSEP)

11.6.1 Intended Use

Use this screen to generate a report on all units that have not yet been separated within a specified date range. This report gives details on units, such as the collection date/time, the insert date, and the bag configuration. This report identifies units which should have been separated into components but are lacking any such data. This report is useful in crisis workload planning and in identifying units which need additional data input for completion.

11.6.2 Accessing the Screen

Access this screen from the Check-In Reports menu or by entering the keyword `MCRUNSEP`.

12.1 Component Production Detail by Batch (CPRPRODB)

12.1.1 Intended Use

Use this screen to generate a report that gives details on products within a specified batch, such as collection date, product code, and component definition time. Use this report to reconcile component preparation by batch ID. This report provides the number of components produced, discarded bags, and primary collection bag for reconciliation. It also helps in identifying outstanding components that have not yet been defined, and lists all the units in the batch for which no components have been defined.

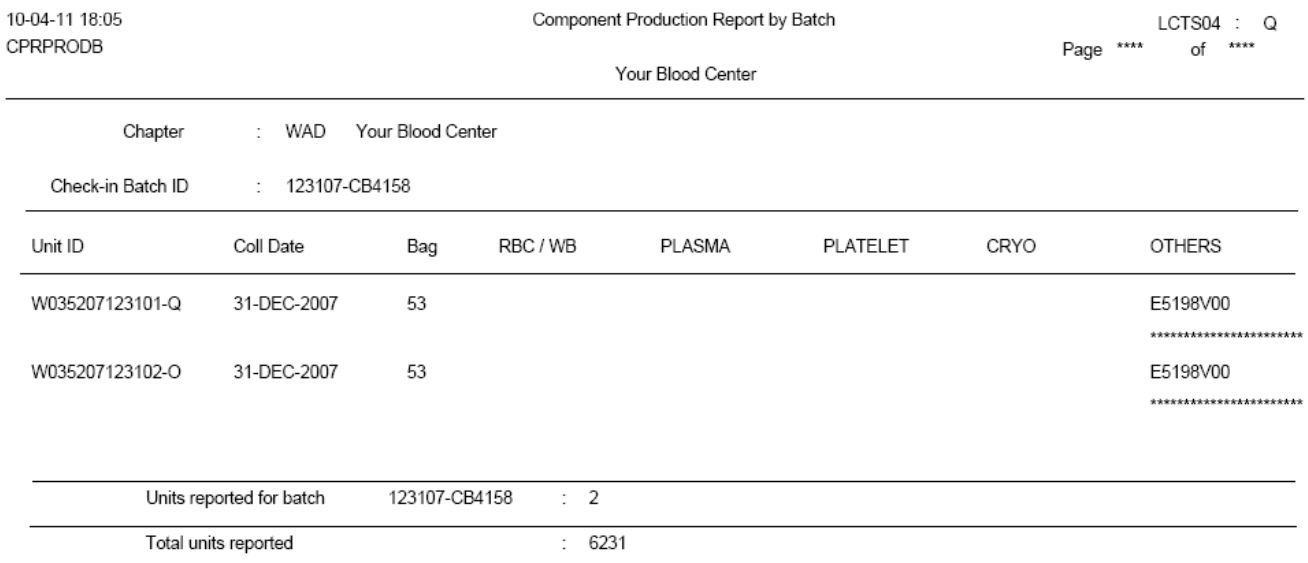

12.1.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRPRODB`.

12.1.3 Generating the Report

12.2 Component Prod. Detail by Date/Time (CPRPROD)

12.2.1 Intended Use

Use this screen to generate a report detailing components that were manufactured on a specific date and time. This report lists specific components manufactured from units meeting criteria the user has specified. Report data includes unit ID, collection date, bag, product code, and description.

12.2.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRPROD`.

12.2.3 Generating the Report

12.5 Component Quarantine Report (CPRTOHLD)

12.5.1 Intended Use

Use this screen to generate a report detailing components in quarantine within a specified collection timeframe. This report details components from units or entire units requiring quarantine (e.g., components currently labeled HOLD or needing to be labeled HOLD). This report is used as a tool to verify that all components needing quarantine have been labeled as HOLD.

12.5.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRTOHLD`.

12.6 Component Discard Report (CPRTOREJ)

12.6.1 Intended Use

Use this screen to generate a report detailing components collected within a specific timeframe that are flagged for discard and their current system level decisions. This report details units/components with interdictions or HOLD reasons for ease of verification. Use this report to reconcile the number of outstanding components/units that have not been properly labeled for discard. Report data includes unit ID, collection date, system label decision (SLD), product code, interdiction description, and hold reason.

12.6.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRTOREJ`.

12.10 Bag to Component Reconciliation Report (CPRBAGCF)

12.10.1 Intended Use

Use this screen to generate a report that gives details on components made for the bag type of a unit on a specified date, such as the unit ID, collection date, bag type, expected components, components made, and the number of bags used. Use this report to reconcile components made against the bag type of the unit after component preparation. This will aid in identifying missing components and inventory management.

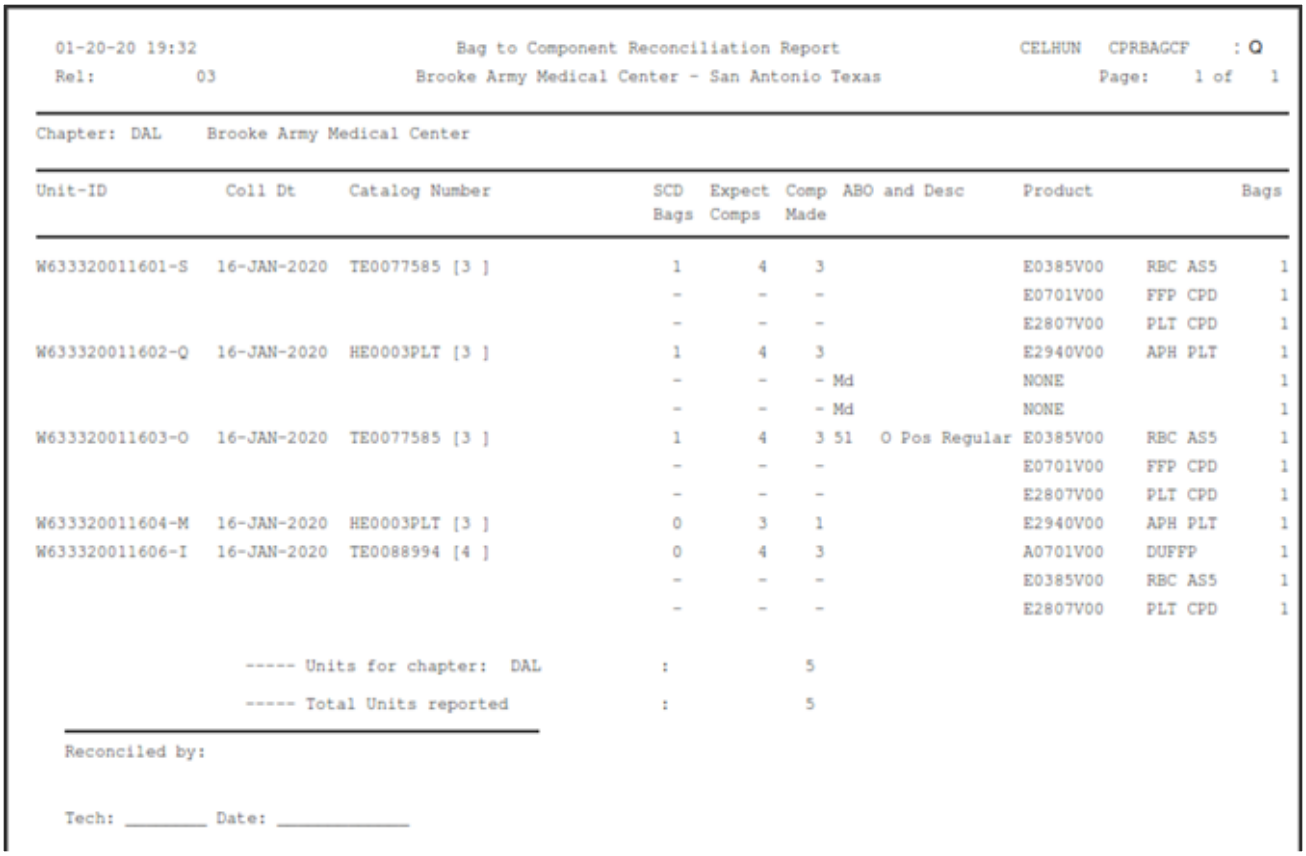

12.10.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRBAGCF`.

12.10.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information

Tech: _____ Date: _____

Rules of the Report:

1. If all of the products are defined where all bags have a component, then the unit will not appear on the report.
2. If a unit does not have any products defined for at least one container of the catalog, then the unit will not appear on the report.
3. The *Expect Comps* column is the number of bags defined in the catalog + Add on bags.

12.12 Components Suitable for FFP Conversion (CPRABOFR)

12.12.1 Intended Use

Use this screen to generate a report detailing available frozen recovered plasma and cryo-destined plasma components suitable for FFP conversion within a given date range and for specified ABO types. The report selects product type of DUFFP, RPL, and RPFF meeting cGMP criteria of FFP. Use this report to define which components are available for immediate conversion to FFP.

12.12.2 Limitations

Component must have a valid tested ABO/Rh and must not have been ABO labeled. Slow bleeds do not appear on the report.

12.12.3 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRABOFR`.

12.12.4 Generating the Report

12.17 Discard Product Detail Report (CPRDISCD)

12.17.1 Intended Use

This report can be used to see the discarded products in Lab and Distribution by discard date and product type.

12.17.2 Accessing the Screen

Access this screen from the Component Reports menu or by entering the keyword `CPRDISCD`.

12.17.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	No	Use ALL for all chapters in the institution
Enter From Discard Date:	No	No	Date format in MM-DD-YYYY
Enter To Discard Date:	No	No	Date format in MM-DD-YYYY
Enter Product Type:	Yes	No	Use ALL for all Lab product types in the institution
Enter Reject Reason Code:	Yes	Yes	Use ALL for all reject reason codes defined in Lab and Distribution in the institution
Enter Interdiction Code:	Yes	Yes	Use ALL for all interdictions in Lab in the institution

12.17.4 Sample Report

This report is divided into 3 sections:

- Lab Discards – gives the final total of discards/rejected components.
- Distribution Discards – gives the final total of discards/rejected components.
- Summary – gives the totals for both Lab and Distribution.

The Lab and Distribution sections are sorted by discard date in descending order and grouped by product type.

The products are displaying based on the product type in the Lab Product Code table.

Limitation

If a BIO product is labeled through the main labeling functions, it will not appear on the discard report. BIO products must be labeled through Reject Unit/Component (REJECT) in order to appear on the report.

RBC	RACC	Reportable Accident	1
WB	BIOU	BIO Unit	1
WB	CLOT	Clot In Component	1

The Summary section displays the total discarded products in Lab, Distribution, and the two together. The section listing the product types and reject code is the accumulation of reject codes and interdictions between Lab and Distribution.

NOTE – The summary of the reject reason is limited based on the code and the description of the code. If you have the same code, but different descriptions, they will be listed as separate entries.

NOTE – If the product is packed through the screen Pack Lab Discards to Discard (PACKLD), the products will be seen under the Lab section and not under the Distribution section.

NOTE – If you perform Generate Outdates Picklist (OUTDATE), and then Move Outdates to Outdate Location (MOVEOUT) and run the report, the unit and product will be under the Distribution section and will have EXP under customer with 0000 for the reason. This indicates that the product was expired and outdated.

W633320083197-N	09-30-23	WB	E0009100	0000	EXP

-------- Subtotal for WB : 1

Once the product is packed and shipped, it will display the discard customer ID by the unit.

Access the Testing Reports using the following menu:

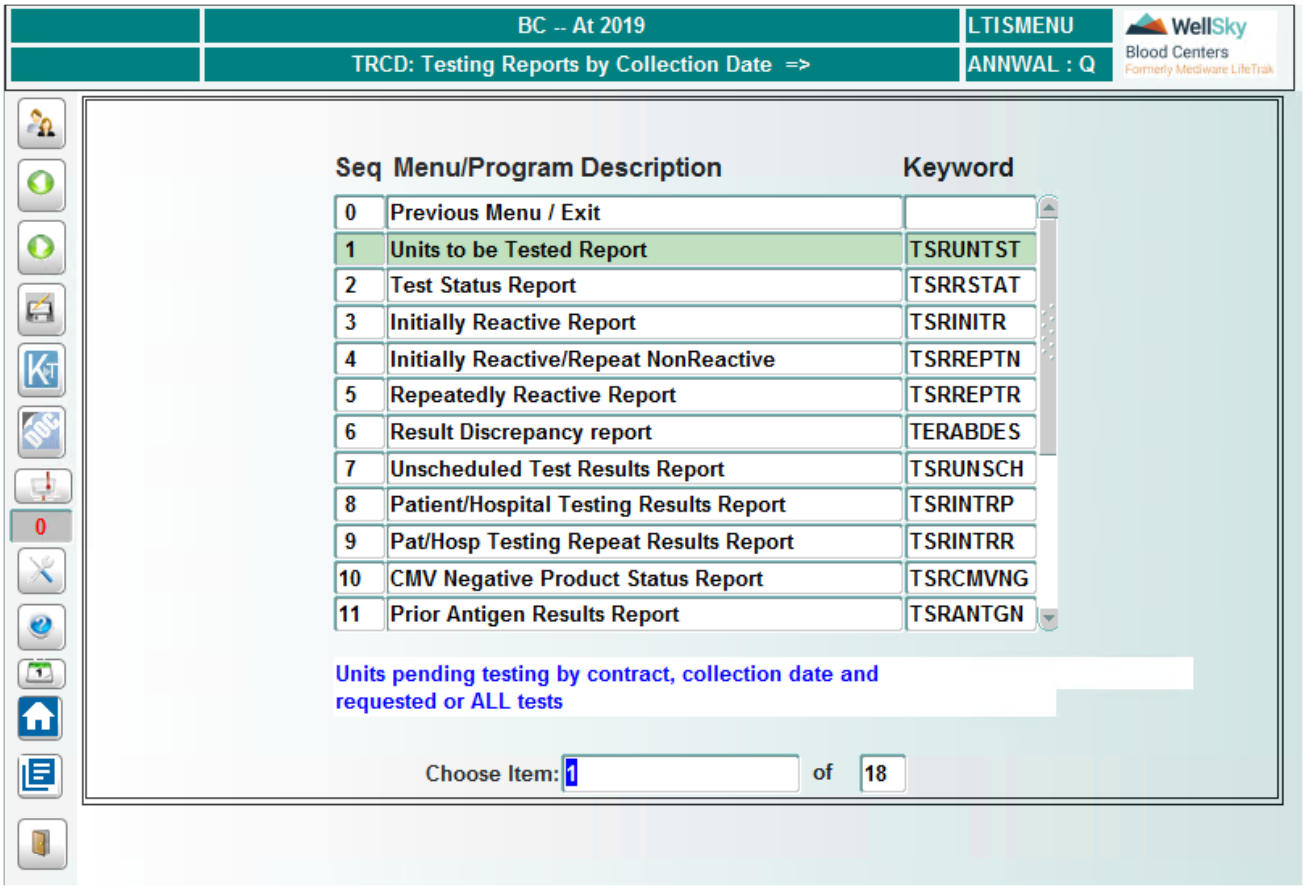

These reports are separated into two separate menus:

- Testing Reports by Collection Date
- Testing Reports by Receive Date

13.1 Testing Reports by Collection Date

Access the Testing Reports by Collection Date using the following menu:

13.1.1 Units to be Tested Report (TSRUNTST)

Intended Use

Use this screen to generate a report that details each unit with tests to be completed within a specified date range. This report displays only tests which are pending in the Scheduled Tests table. For internal, testing services, or custom testing, tubes must be checked-in to be reported.

Accessing the Screen

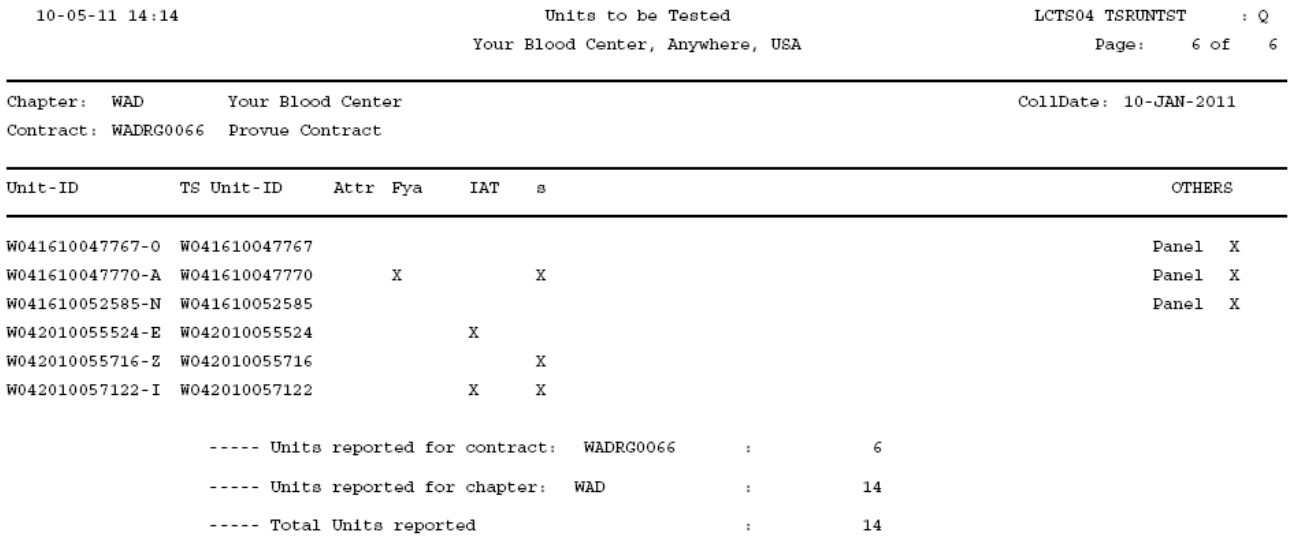

Access this screen from the Testing Reports by Collection Date menu or by entering the keyword `TSRUNTST`.

13.1.5 Repeatedly Reactive Report (TSRREPTR)

Intended Use

Use this screen to generate a report of units that tested reactive more than once for a particular test within the specified date range. Each test you specify by test group and test ID is listed along with the initial results for each unit and the repeat results. This report displays scheduled tests for internal, testing service, and custom testing units.

Prerequisites

- Test result must be configured in master code RESUL.
- Tests with NT test results will not display on the report.

WellSky Corporation
Proprietary and confidential

- Tests must have an NFT or BIO type interdiction associated with it.

Accessing the Screen

Access this screen from the Testing Reports by Collection Date menu or by entering the keyword `TSRREPTR`.

13.1.6 Result Discrepancy Report (TERABDES)

Intended Use

Use this screen to generate a report that identifies all units within a specified collection date range having discrepancies between current testing and historical data in the donor file; result can be from any discrepant result that causes the placement of a DISU interdiction.

Accessing the Screen

Access this screen from the Testing Reports by Collection Date menu or by entering the keyword `TERABDES`.

Generating the Report

13.1.7 Unscheduled Test Results Report (TSRUNSCH)

Intended Use

Use this screen to generate a report that details unit test results for unscheduled testing within a specified collection timeframe. This report lists all units that have unscheduled tests (UTB). This report details all tests on the internal profile.

NOTE – The report will print the units that fall within the entered parameters and any unit that is in unscheduled without a collection date.

Accessing the Screen

Access this screen from the Testing Reports by Collection Date menu or by entering the keyword `TSRUNSCH`.

Generating the Report

13.2 Testing Reports by Receive Date

Access the Testing Reports by Receive Date using the following menu:

13.2.1 Initially Reactive by Receive Date (TSRINIT2)

Intended Use

Use this screen to generate a report of units that initially tested reactive for a particular test and are awaiting repeat testing. This report displays scheduled tests only for internal, testing service, and custom testing units and is considered a retest report.

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRINIT2`.

NOTE – The test(s) displaying horizontally across the page are those test(s) listed in the primary profile for the contract. The OTHER column displays tests that were added or are part of a secondary profile or the ad hoc profiles.

13.2.2 Repeatedly Reactive by Receive Date (TSRRPTR)

Intended Use

Use this screen to generate a report of units that tested reactive more than once for a particular test within the specified date range. Each test you specify by test group and test ID is listed along with the initial results for each unit and the repeat results. This report displays scheduled tests for internal, testing service, and custom testing units.

NOTE – Any contract that contains ISBT 128 units will not display the associated check digit in the unit ID. If the check digit must be seen, run the report Repeatedly Reactive Report (TSRREPTR).

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRRPTR`.

13.2.6 CMV to be Tested by Receive Date (TSRUNCM2)

Intended Use

Use this screen to generate a report that details units, which do not have the CMV testing completed within a specified collection date range.

Limitation

This report is not used for internal units.

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRUNCM2`.

Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter Contract ID	Yes	Yes	N/A
Enter From Received Date	No	No	Default is the previous day; to change, use the MM-DD-YYYY format
Enter To Received Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format

Sample Report

13.2.7 Unscheduled Test Results by Receive Date (TSRUNSC2)

Intended Use

Use this screen to generate a report that details unit test results for unscheduled testing within a specified received date timeframe. This report lists all units that have unscheduled tests (UTB). This report details all tests on the internal profile.

NOTE – This report will never display units that have a null collection date and null chapter ID.

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRUNSC2`.

----- Test voided/Edited/Cancelled on : 20-FEB-2024 4 (1 Units)

----- Tests voided/Edited/Cancelled for chapter : DAL 4 (1 Units)

----- Total Tests voided/Edited/Cancelled : 4 (1 Units)

WellSky Corporation
Proprietary and confidential

The TERVOID report contains tests that have been canceled, voided by test or by batch, tests that have been edited, and batches that were canceled in the Holding Tests table. If the check for discriminate results is set in the TEST table, and results do not match based on historical results, or multiple results do not match (not repeats), those units will also display.

- EDITOBS – Edit Test Observation Results ('E')
- SUPVOID, VOID, VOID1, VOID2 – Void Test Results ('V')
- LCANCEL – Cancel Schedule Tests ('C')
- VOIDTB, VOIDTB1, VOIDTB2 – Void Test Batch ('P')
- EDIT – Edit Test Results ('E')
- CANCELTB – Cancel Test Batch (In Holding Area) ('D') will have void reason of CATB

NOTE – The TERVOID report is automatically generated from the following programs when the transaction is completed.

- Void/SUPVOID/Cancel Test Results (VOIDCA)
- Void Test Batch (VOIDTB)
- Cancel Test Batch (in Holding Area) (CANCELTB)

13.2.13 Tests Performed Summary Report (TSRTESMR)

Intended Use

Use this screen to generate a report that summarizes the test performed within a receive date range by a contract ID.

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRTESMR`.

Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter Contract ID	Yes	Yes	N/A
Enter From Receive Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format
Enter To Receive Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format

13.2.14 Repeatedly Reactive Detail with OD/Ratio (TSRRODC)

Intended Use

Use this screen to generate a list of units that have a final reactive test result within the specified date range. Each test that is specified by test group and test ID is listed, along with the initial results for each unit and the repeat results. This report displays scheduled tests for internal, testing service, and custom testing units. This report will give test result details on units tested within the specified date range, such as the result interpretation and the OD and ratio values.

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `TSRRODC`.

13.2.16 Unit Interdiction by Receive Date (MCRUINT2)

Intended Use

Use this screen to generate a report that gives details on all units with interdictions within a specified date range, such as unit IDs, batch IDs, interdiction codes, and descriptions. Use this report to identify units in the system with associated interdictions. This report can also be used in quarantine reconciliation, especially for those units having interdictions other than testing.

NOTE – When selecting to print the header page it will print on two pages. If you do not select a testing lab it will print NULL for the performing test lab.

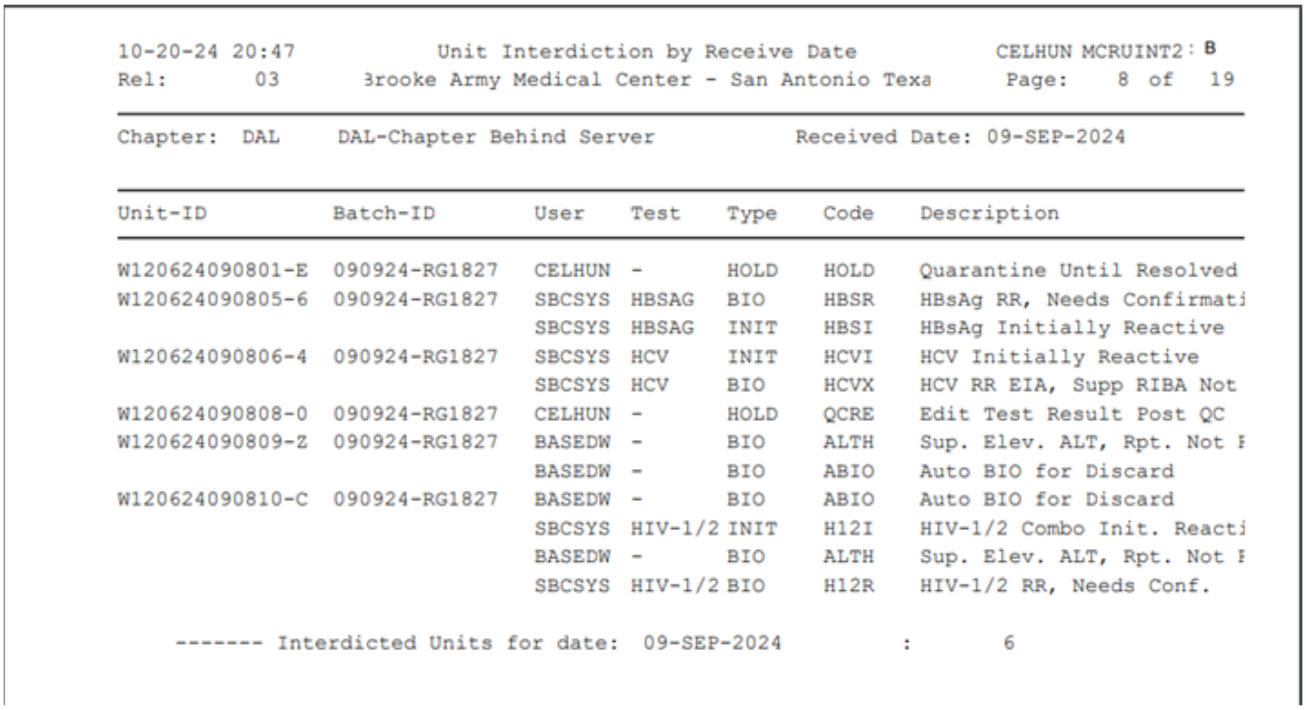

Accessing the Screen

Access this screen from the Testing Reports by Receive Date menu or by entering the keyword `MCRUINT2`.

Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter From Receive Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format
Enter To Receive Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format
Enter Interdiction Code	Yes	Yes	Entry of ALL will select all interdiction codes.
B-BIO, H-Hold, I-Initial, N-NFT or ALL	Yes	No	Types of interdictions to be pulled to report. ALL will bring all interdiction types.

14.2 Labeled Product Summary by Labeler Report (CPRLAUSU)

14.2.1 Intended Use

Use this screen to generate a report that gives details of the number of components labeled by a user within the specified date range. Use this report to review productivity for collections by date range. This report can show trends in labeling and is useful as a tool in training needs.

14.2.2 Accessing the Screen

Access this screen from the Labeling Reports menu or by entering the keyword `CPRLAUSU`.

14.2.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID

14.3 Labeling Reconciliation Report (CPRLACTC)

14.3.1 Intended Use

Use this screen to generate a report that gives details on components labeled from a unit on specified date, such as the unit ID, collection date, bag type, and components labeled. Use this report to reconcile components labeled against the bag type of the unit after component labeling. This will aid in identifying missing components and inventory management.

14.3.2 Accessing the Screen

Access this screen from the Labeling Reports menu or by entering the keyword `CPRLACTC`.

14.3.3 Generating the Report

14.4 Unlabeled Components Detail Report (CPRUNLBL)

14.4.1 Intended Use

Use this screen to generate a report that gives details on components not labeled from a unit on a specified date, such as unit ID, collection date, bag type, and unlabeled components. Use this report to reconcile unlabeled components against the bag type of the unit after component labeling. This will aid in identifying missing components and inventory management.

14.4.2 Accessing the Screen

Access this screen from the Labeling Reports menu or by entering the keyword `CPRUNLBL`.

14.4.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	No	If entering multiple chapters, each chapter will start on a new page.
Enter Warehouse ID	Yes	No	Defaults to ALL, but allowed to enter a specific warehouse ID or multiple IDs.
Enter From Collection Date	No	No	Default is current date; MM-DD-YYYY
Enter To Collection Date	No	No	Default is current date; MM-DD-YYYY
Product type	Yes	No	Will default ALL.

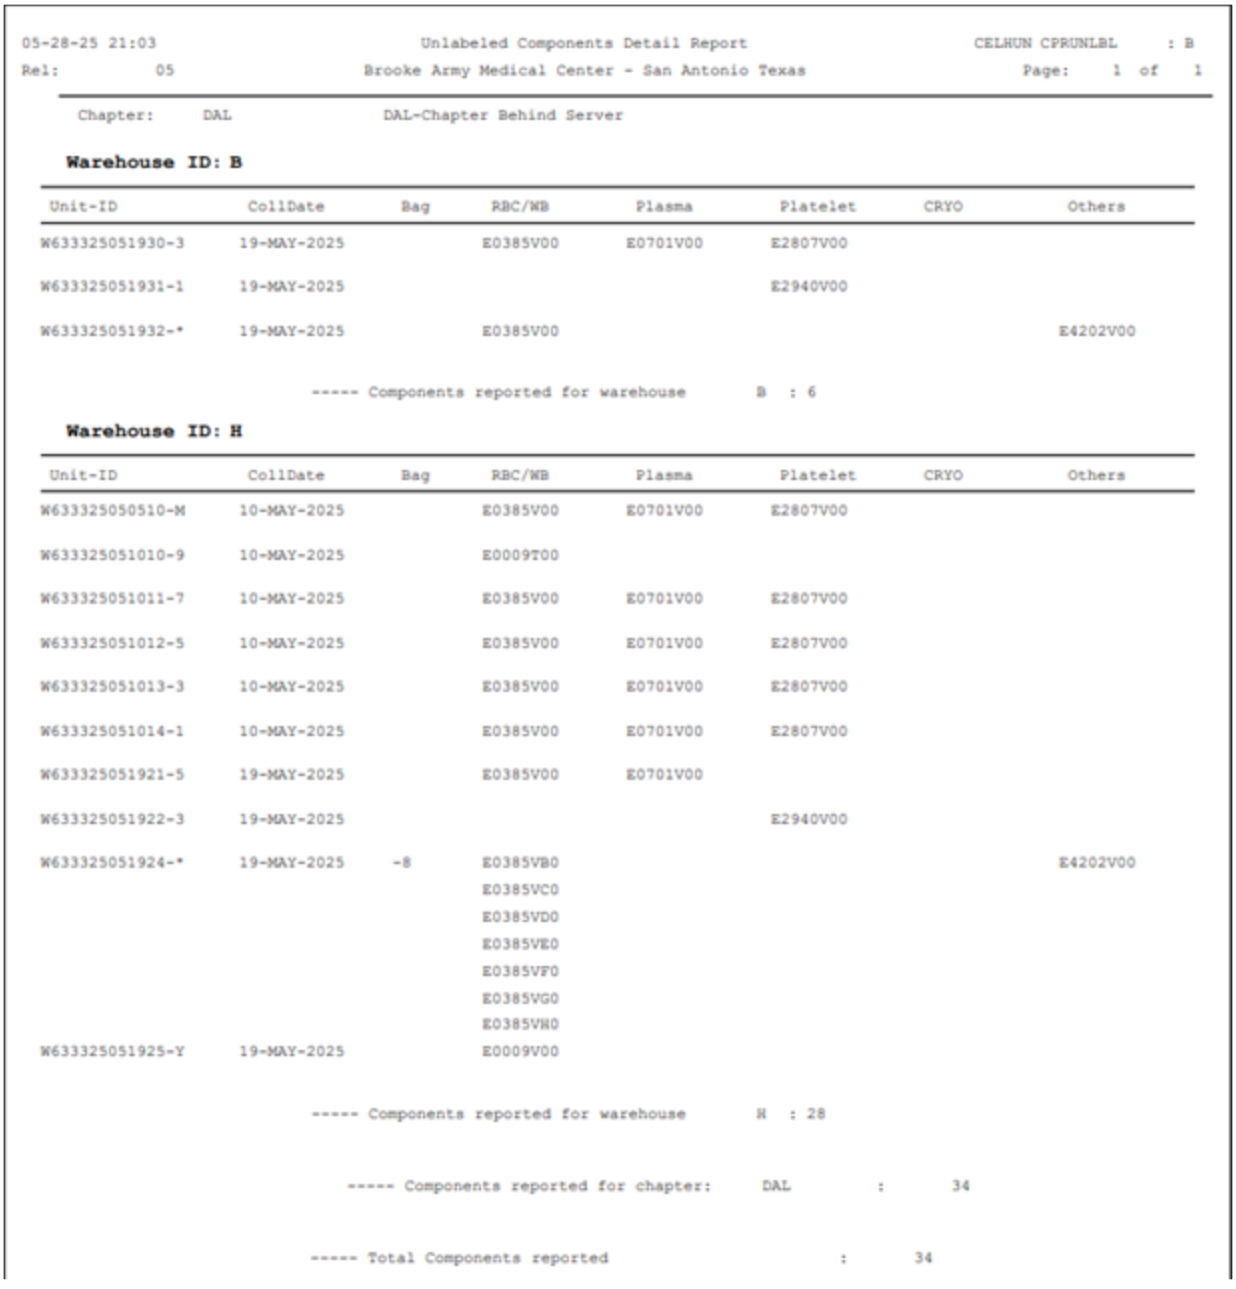

When generating the report, use the following parameters:

- Chapter ID – you must know the chapter IDs; there is not a list of values. Enter the first value and then press ENTER to move to the next line to enter the next chapter. If you want to run the report for ALL chapters, enter **`ALL`** (this is all chapters for the facility). The report does not check the user's logged-in access to chapters.
- Warehouse ID – you must enter the warehouse IDs. Enter the first value and then press ENTER to move to the next line to enter the next warehouse. If you want to run the report for ALL warehouses for the specified chapter, enter **`ALL`** (this is all warehouses for the facility). The report does not check for the user's logged-in access to the warehouses.

Chapter 15 - Imported Products Reports

15.1 Imported Products Received Report (IMRECVD) 223

Access the Imported Products Reports using the following menu:

Refer to Chapter 24 in the WellSky Blood Centers User Guide for more information on the following options:

- Option 1 – Imported Blood Contract (IMCONTR)
- Option 2 – Imported Blood Product Check-In (IMPORT)
- Option 3 – Imported Blood Check-In Batch QC (IMPORTQC)
- Option 4 – Correct Imported Unit Data (IMPCORR)

Refer to the WellSky Blood Centers Administration Guide for more information on Option 5 – Valid Collection Facilities (COLLID).

WellSky Corporation
Proprietary and confidential

15.1 Imported Products Received Report (IMRECVD)

15.1.1 Intended Use

Use this screen to generate a report that gives details on imported units within the specified date range, such as the unit ID, the received date, and the product code. Use this report to review imported products received from a contract in a particular time period.

15.1.2 Limitations

Report should be generated immediately after import is complete in order to display the appropriate components. If imported components are modified prior to report generation, the newly created component will display in the report.

15.1.3 Accessing the Screen

Access this screen from the Imported Blood Processing menu or by entering the keyword `IMRECVD`.

15.1.4 Generating the Report

16.2 Unit Audit Information Report (GERAUDIT)

16.2.1 Intended Use

Use this screen to generate a report that gives unit audit information, with details such as user name, date/time processes performed, interdictions, interfaces, etc. Use this report to review the history of a unit.

16.2.2 Limitations

- If a process is performed at the same date and same time (HH:mm), the report displays the action in alphabetical program order. For example, MCISCREN, MCIBAGS, and MCIBAGS will appear prior to part of the check in. This is due to the insert date being performed at the HH:mm instead of HH:mm:ss.
- If you access the PRINT form prior to the audit report completing, you must refresh the screen in order to update the status. The Unit Audit Information Report takes longer than a usual report, due to the complex checks involved in completing the report.

16.2.3 Accessing the Screen

Access this screen from the Unit Reports menu or by entering the keyword `GERAUDIT`.

16.2.4 Generating the Report

17.4 Non-Extracted Batch Report (RGRRNEXT)

17.4.1 Intended Use

Use this screen to generate a report that lists batch ID, unit ID, OS unit ID, test ID, sequence, result, result date, IR, IX, and last extract. Use this report to list non-extracted check-in batches by regional report.

17.4.2 Accessing the Screen

Access this screen from the Regional Sample Tracking Reports menu or by entering the keyword `RGRRNEXT`.

17.4.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter Contract ID	Yes	Yes	N/A
Enter From Date	No	No	Default is the previous day; to change, use the MM-DD-YYYY format
Enter To Date	No	No	Default is the current date; to change, use the MM-DD-YYYY format

17.5 RSM Report (RSMREP)

17.5.1 Intended Use

Use this screen to manually generate an RSM report. This report can also be generated directly from the Extract Test Results (EXTRACT) and Re-Extract Test Results (REXTRACT) screens.

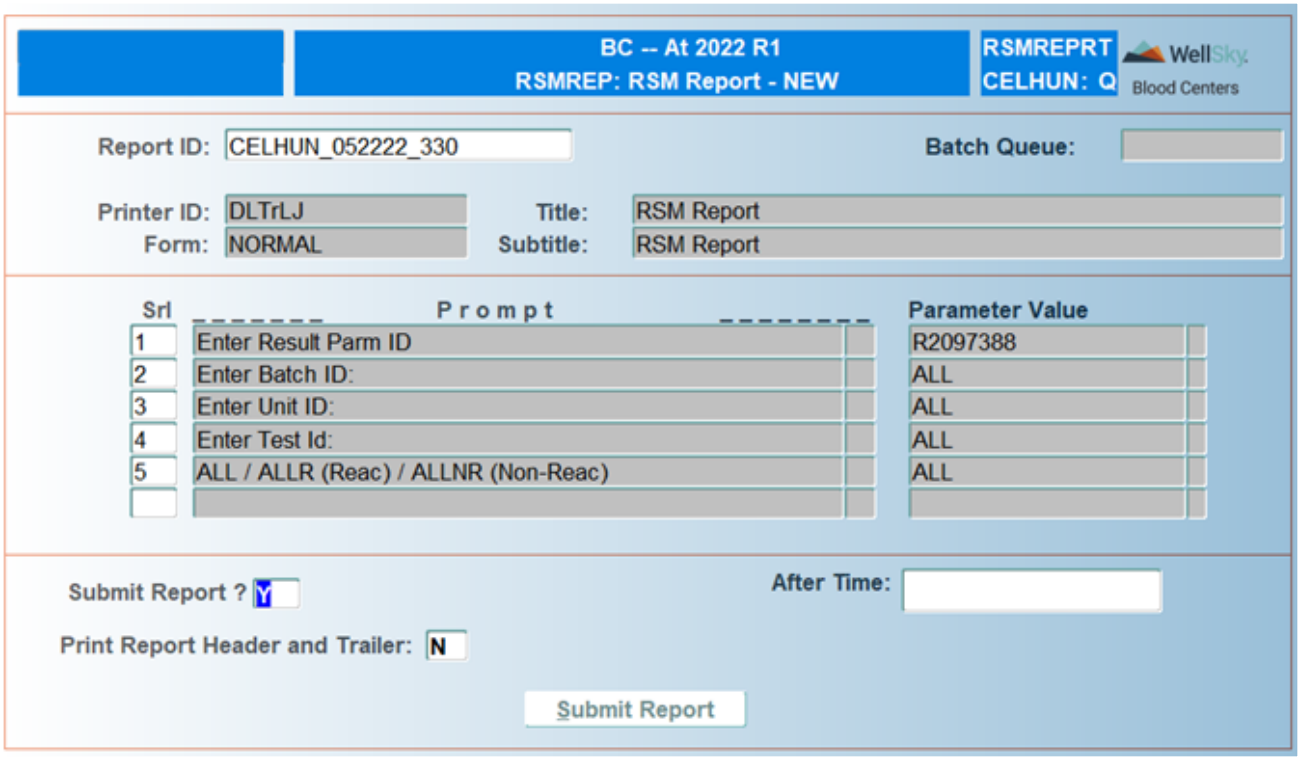

WellSky has also created an RSM Report specific to New York State, called NY RSM Report Management. This report contains identical data, but with wording specific to New York. Access this screen from the Regional Sample Tracking Reports menu by entering the keyword `NYRSMREP`.

17.5.2 Accessing the Screen

Access this screen from the Regional Sample Tracking Reports menu by entering the keyword `RSMREP`.

17.5.3 Generating the Report

This report is normally generated directly from the EXTRACT and REXTRACT screens by leaving the default value `Y` in the *Generate RSM Report* field. It can also be generated by entering the keyword `RSMREP` and populating fields in the following screen:

WellSky Corporation
Proprietary and confidential

Set-Up Needed

The result and test legend configuration will be done in Lab master code RLGND. The master code will contain the results configuration.

Enter the Code Type: RLGND Result Legend for RSM Reports

Code	Description	Seq 1	Seq 2	Seq 3	Eff Dt	Term Dt	Mod Dt
R1	NT / UND = Not Tested	1	0	0	13-OCT-2024		15-OCT-2024
R10	LP/L = Low Titer Positive	10	0	0	13-OCT-2024		15-OCT-2024
R11	HP/H = High Titer Positive	11	0	0	13-OCT-2024		15-OCT-2024
R12	CONF/NCON = Confirmed/NonConfirmed	12	0	0	13-OCT-2024		15-OCT-2024
R13	CONF = Confirmed	13	0	0	15-OCT-2024	15-OCT-2024	15-OCT-2024
R2	X = No Test Result	14	0	0	13-OCT-2024		17-OCT-2024
R3	TP = Technical Problem	3	0	0	13-OCT-2024		15-OCT-2024
R4	P/Pos = Positive	4	0	0	13-OCT-2024		15-OCT-2024
R5	R = Positive / Reactive	5	0	0	13-OCT-2024		15-OCT-2024
R6	IDS = IDS Tested	6	0	0	13-OCT-2024		15-OCT-2024
R7	N/NR/NEG = Negative / Nonreactive	7	0	0	13-OCT-2024		15-OCT-2024
R8	DSCRP = ABORH Discrepancy	8	0	0	13-OCT-2024		15-OCT-2024
R9	IN = IDS Nonreactive/Negative	9	0	0	13-OCT-2024		15-OCT-2024

The legend will print the description and will be in order based on Seq 1.

NOTE – If the contract has test mapping [Enter Test Mapping (TMAP)] and/or results mapping [Enter Results Mapping (RMAP)] defined, the legend will contain those test IDs and results in place of the Blood Centers test IDs and results.

Report ID

The system will automatically generate the report ID. Enter **NEW** in the field, or just press ENTER to move to parameter values. The repoort ID generates with User ID + current date + sequential number.

Result Parm ID

Enter a result parm ID or select from the LOV. The system allows multiple parm IDs to be selected.

Batch ID

Enter a batch ID or select from the LOV. Leave the default value ALL to select all batch IDs.

NOTE – If multiple Parm IDs are entered, then the Batch ID, Unit ID, Test ID, and Result Status should be set to ALL. If you need to generate a report for a specific test, batch, or unit, then it should be generated as a single Parm ID.

Unit ID

Leave the default value ALL to select all Unit IDs. Otherwise, click the VALUE icon and enter a specific Unit ID.

NOTE – If multiple Parm IDs are entered, then the Batch ID, Unit ID, Test ID, and Result Status should be set to ALL. If you need to generate a report for a specific test, batch, or unit, then it should be generated as a single Parm ID.

Test ID

Leave the default value ALL to select all Unit IDs. Otherwise, click the VALUE icon and enter a specific Test ID.

NOTE – If multiple Parm IDs are entered, then the Batch ID, Unit ID, Test ID, and Result Status should be set to ALL. If you need to generate a report for a specific test, batch, or unit, then it should be generated as a single Parm ID.

Result Status

Leave the default value ALL to select all result statuses. Otherwise, select the desired result status from the LOV.

NOTE – If multiple Parm IDs are entered, then the Batch ID, Unit ID, Test ID, and Result Status should be set to ALL. If you need to generate a report for a specific test, batch, or unit, then it should be generated as a single Parm ID.

17.10 Extract Log Report RGREXLOG

17.10.1 Intended Use

This report automatically generates when the EXTRACT function occurs in Regional Sample Management. The report describes the actions that occurred during extract, such as skipped samples, the number of results extracted, and the number of units included in the extract.

17.10.2 Accessing the Screen

This screen cannot be accessed from the menu, it only generates at the time of extract.

17.10.3 Generating the Report

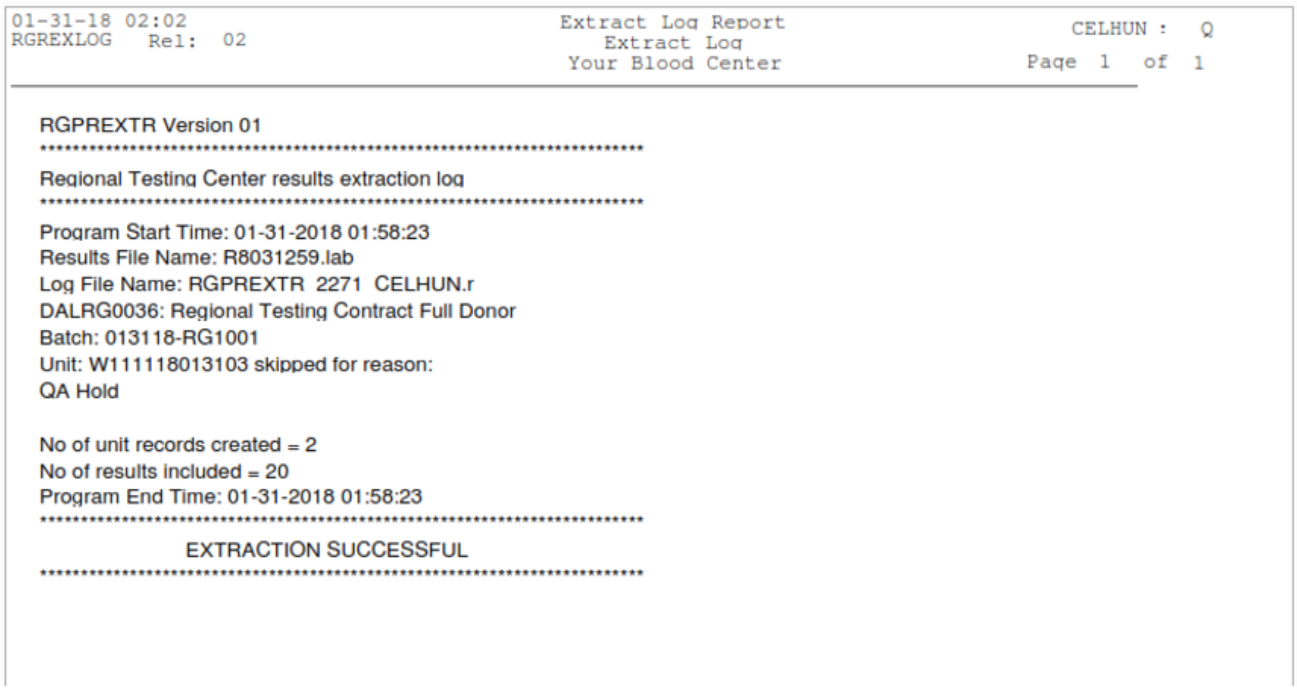

Perform EXTRACT in Regional Sample Management.

The following Information is included in the report:

- Extract File name – Starts with the Parm ID
- Log file name
- Contract Name: Contract ID and Description
- Check-in Batch ID
- Exceptions listed, such as:
  - Skipped Samples
  - Reason for abort of extract
  - Extra results present beside the profile

17.11 Customer Profile Report RGRCUSPR

17.11.1 Intended Use

This report can only be printed from the Contract Profile Test Query (RGPROFQ) screen. It lists the profile test details for a specified testing contract.

NOTE – Only one profile sequence can be printed in the report. This is a limitation of the report.

17.11.2 Accessing the Screen

This screen cannot be accessed from the menu; it can only be generated from the Contract Profile Test Query (RGPROFQ) screen.

17.11.3 Generating the Report

Perform a query on the Contract Profile Test Query (RGPROFQ) screen. Press F2 to print the query results.

NOTE – The sequence that prints will be based on which sequence number the cursor is on in the Contract Profile Test Query.

18.1 Scheduled but Not Transferred In Report (RGRCKPND)

18.1.1 Intended Use

This report contains information pertaining to samples that have been transferred out, but have not been checked in to the receiving facility.

18.1.2 Accessing the Screen

Access this report from the Regional Sample Tracking Reports menu, or by entering the keyword `RGRCKPND`.

18.1.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter From Date	No	No	
Enter To Date	No	No	
Enter Contract ID	Yes	No	
Enter Test ID	Yes	No	
Enter Shipped To Facility	Yes	No	

NOTE – Once a sample is transferred in (STIN), the sample will be removed from the report.

NOTE – A test ID will only appear if the original chapter scheduled the confirmatory test. If a confirmatory test was not defined in the Test table, or an override occurred in regional contract, the test ID will be blank.

18.6 Confirmatory Extract Log Report (CNPREXTR)

18.6.1 Intended Use

This report automatically generates when the EXTRACT function occurs in Confirmatory Sample Management. The report describes the actions that occurred during extract, such as skipped samples, the number of results extracted, and the number of units included in the extract.

18.6.2 Accessing the Screen

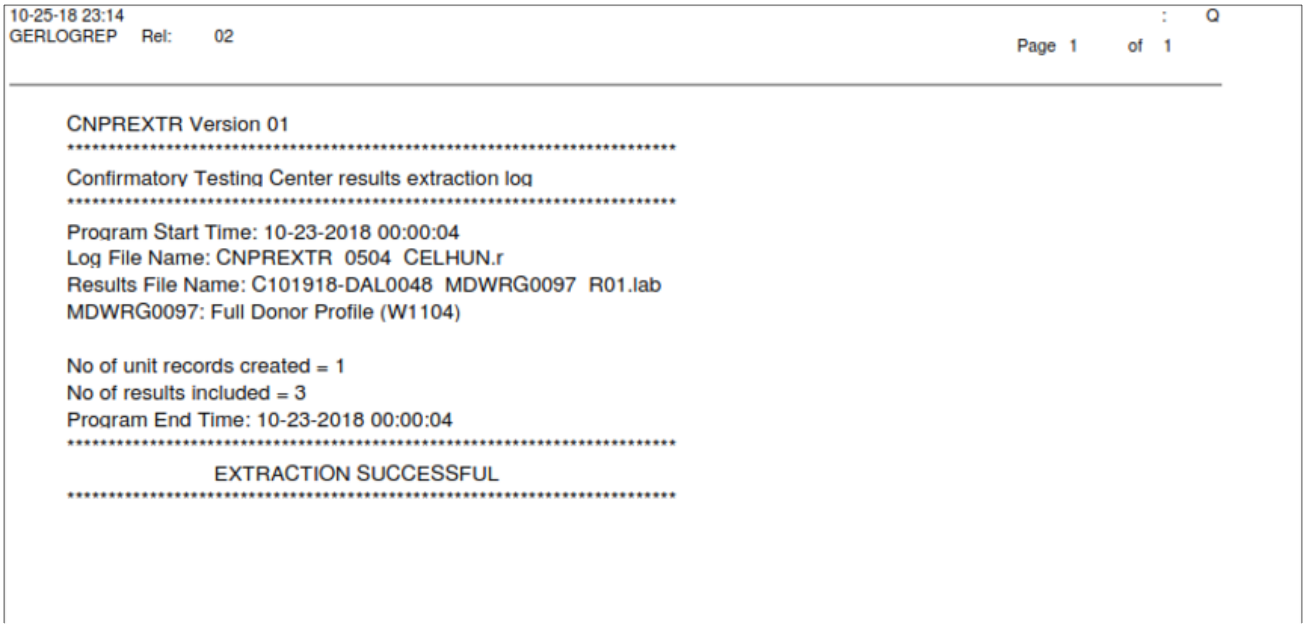

This screen cannot be accessed from the menu. It only generates at the time of extract.

18.6.3 Generating the Report

Perform CEXTRACT in Confirmatory Sample Management. The following information is included in the report:

- Start date/time of extract
- Log File Name - CNPREXTR (extract package name) system number user ID
- Results File Name - starts with the Extract ID (example: C101818-DAL0048 MDWRG0097 R01.lab), which contains the following:
  - C = confirmatory
  - MMDDYY = the date the extract occurred
  - DAL = the chapter the extract occurred in
  - 0048 = system-generated number
  - MDWRG0097 = contract ID
  - R01, E00- E00 = original extract file, R01 = re-extract file appended with number first time re-extracted
- Contract ID - description of contract
- Exceptions listed, such as:
  - Skipped samples
  - Reason for abort of extract
  - Extra results present beside the profile

Tested By:
Dallas Testing Facility CLIA #: 819812 Dir: Dan Clapp M.D. FACS, FABQAURP
1604 Pleasant Run Keller TX 76248

- The Leukoreduced Date comes from the collection date/time field entered in the Sample Transfer In (STIN) screen.
- The Test ID is linked to the test entered in parameter values.
- The count value is coming from the absorbance value for the test.
- The information at the bottom of the form is coming from the VTILABS table for the test chapter.

18.9 Confirmatory Series Report (SERIES1)

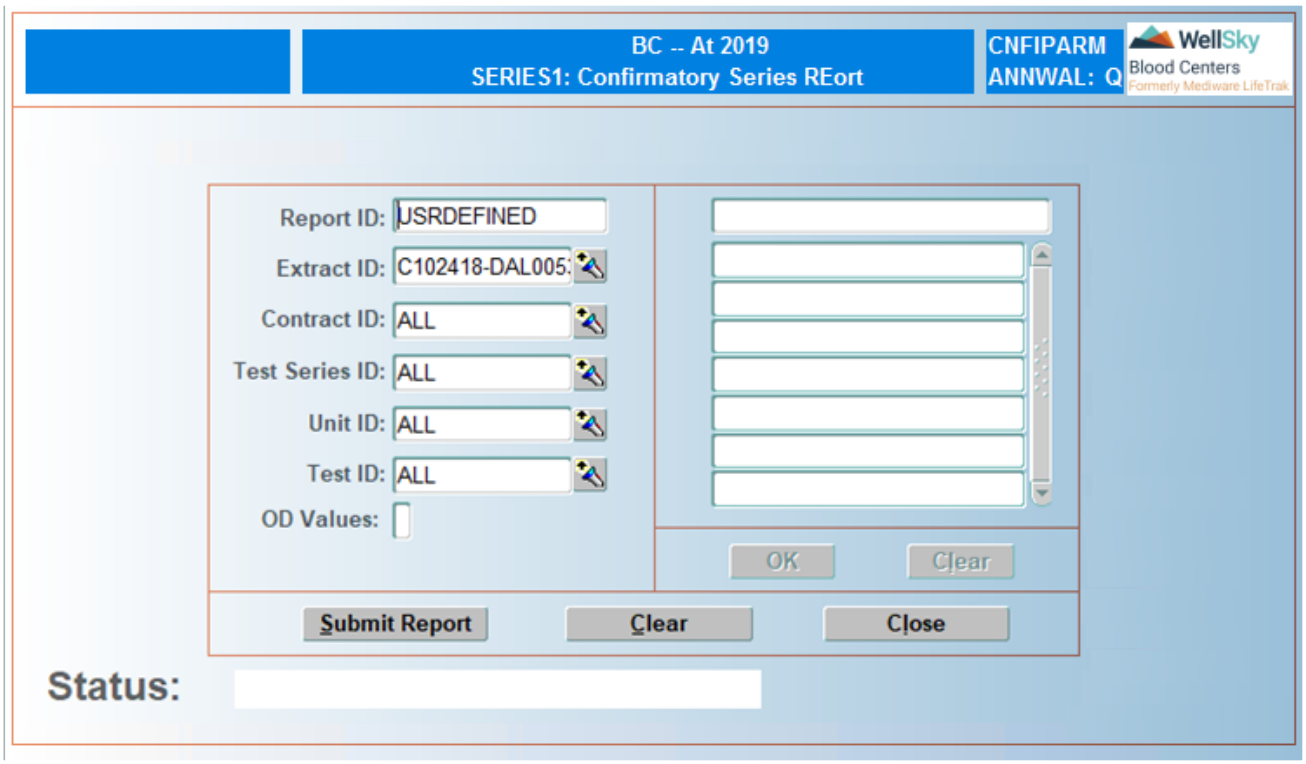

18.9.1 Intended Use

Use this screen to reprint the Test Series Report for confirmatory samples.

18.9.2 Accessing the Screen

Access this screen from the Confirmatory Reports menu, or enter the keyword `SERIES1`.

18.9.3 Generating the Report

Report ID

This is a user-defined field. Enter a report ID that uniquely identifies the report.

Extract ID

Enter the extract ID or select it from the LOV.

NOTE – Only one extract ID can be selected to have the series report generated.

Contract ID

Enter a contract ID or select it from the LOV. Leave the default value ALL to select all contract IDs. Otherwise, click the **Value** icon (), and enter a specific contract ID.

Test Series ID

Leave the default value ALL to select all Test Series IDs. Otherwise, click the **Value** icon (), and enter a specific test series ID.

Unit ID

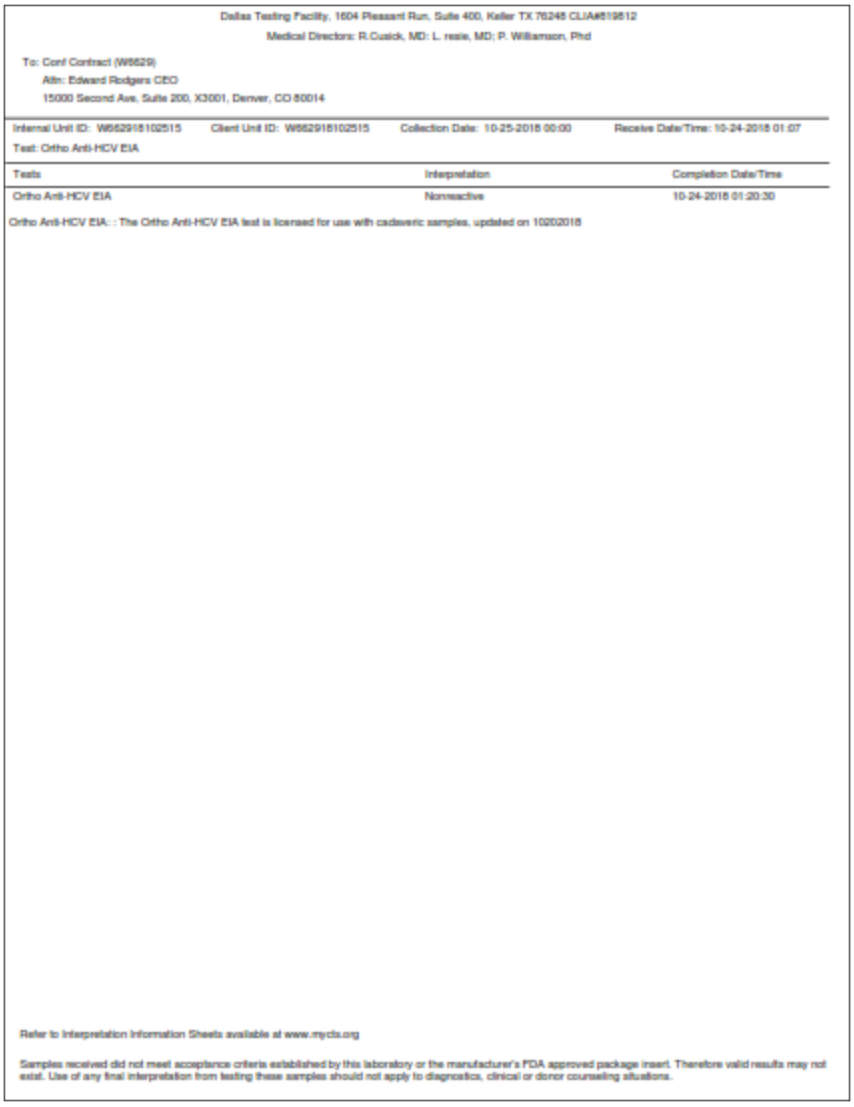

Leave the default value ALL to select all unit numbers. Otherwise, click the **Value** icon (), and enter a specific unit ID.

Test ID

Leave the default value ALL to select all Test IDs. Otherwise, click the **Value** icon () , and enter a specific test ID.

Internal Unit ID: W662918102515 Client Unit ID: W662918102515 Collection Date: 10-25-2018 00:00 Receive Date/Time: 10-24-2018 01:07
Test: Ortho Anti-HCV EIA

Tests	Interpretation	Completion Date/Time
Ortho Anti-HCV EIA	Nonreactive	10-24-2018 01:20:30

Ortho Anti-HCV EIA: : The Ortho Anti-HCV EIA test is licensed for use with cadaveric samples, updated on 10202018

Refer to Interpretation Information Sheets available at www.mycts.org

Samples received did not meet acceptance criteria established by this laboratory or the manufacturer's FDA approved package insert. Therefore valid results may not exist. Use of any final interpretation from testing these samples should not apply to diagnostics, clinical or donor counseling situations.

NOTE – Series reports are generated by test series, test ID, and unit number. Multiple reports can be generated if looking for all tests and test series in an extract ID.

When the series report is generated, the report will be copied to the designated folder defined in the system parameter SERIES_CPY, and the user can view the generated report in the Report Actions (PRINT, SPRINT).

18.10 Result QC Exception Log (CFIRESC)

18.10.1 Intended Use

This report automatically generates when the Confirmatory Release Test Results (CNRQC) function occurs in Confirmatory Sample Management. The report describes the action that occurred during QC for samples that failed, such as Unreconciled Results, Results in Holding Test, Results in Unscheduled, or Too Many Results.

18.10.2 Accessing the Screen

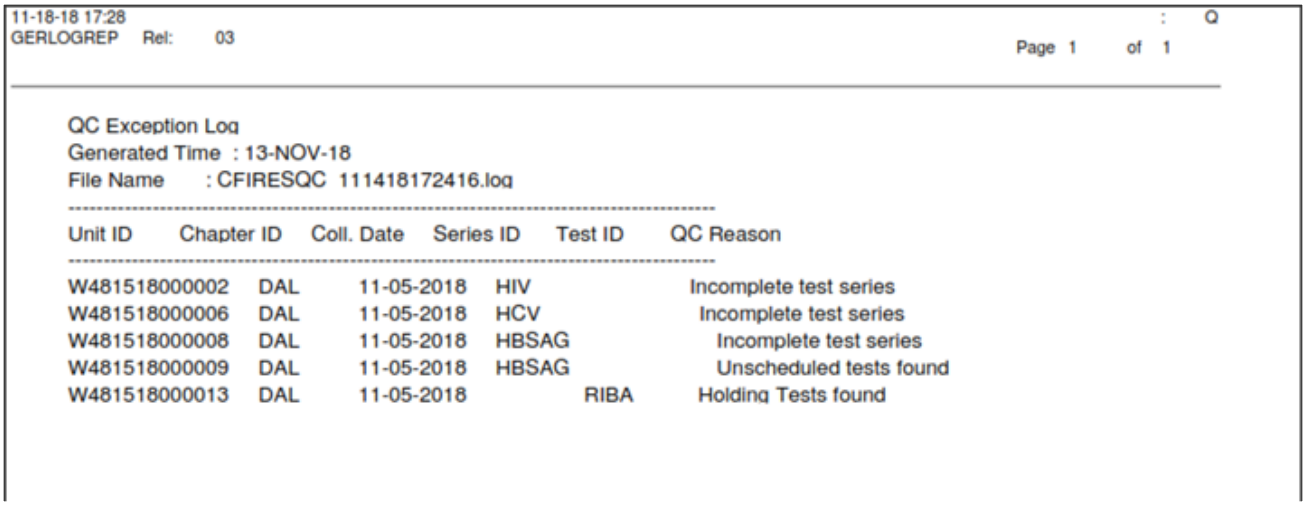

This screen cannot be accessed from the menu. It only generates at the time of confirmatory result QC.

18.10.3 Generating the Report

Perform CNRQC in Confirmatory Release Test Results. The following information is included in the log file:

- Generation date
- File Name - CFRIRESQC MMDDYY number
- Exceptions found:
  - Unit Number
  - Chapter ID
  - Collection Date
  - Series ID
  - Test ID
  - Reason for exception

19.2 Re-Print Unpack Slip (SCRUNPSL)

19.2.1 Intended Use

Use this screen to reprint an unpack slip that is generated either after a product is returned or when restocking unshipped products. This report gives details on the order, such as order number, order class, order date, and ordered items. Use this report to reprint the order slip for the purpose of keeping a record of all products that have been returned to stock.

NOTE – Returned products can be initially entered into the quarantine inventory, depending on the return reason. These products must be released from inventory before they can be packed for another order.

Chapter 20 - Distribution Reports

20.1 Duplicate Pack List (PACKLST) 307
20.2 List of Box Contents (BOXLST) 309
20.3 Shipped Products Detail Report (SHIPREP) 310
20.4 Shipped Products by Customer Type (SHRSMMRY) 312
20.5 Monthly Usage Report – Shipment Summary (SHRSUMCS) 314
20.6 Monthly Usage Report – Return Summary (SHRRESUM) 315
20.7 Re-Print Pick Slip (PICK) 316

Access the Distribution Reports using the following menu.

20.1 Duplicate Pack List (PACKLST)

20.1.1 Intended Use

Use this screen to generate a report of products that have been packed for an order. This report gives details on the packed products, such as product type, blood type, and quantity or ordered items. Use this report to verify the number of requested products packed for an order.

20.1.2 Limitations and Prerequisites

- Pricing for products, antigens, and attributes is only listed if the COD flag is set to Y in Create Customer Profile (CUSTOMER).
- Box weight is calculated when the master code PPLST is defined with the unit of measure and associated weights provided by user for bags and box.
- The box weight includes the weight of each bag, box, and the volume of plasma.
- If the master code PPLST is not defined, the system calculates the plasma volume only in pounds.
- This report can only be generated if the Master Code, PKLST, code PKLST is not defined.
- The STANDARD customer must be defined for each chapter if the facility is multi-chapter.

20.1.3 Accessing the Screen

Access this screen from the Distribution Reports menu or by entering the keyword `PACKLST`.

20.1.4 Generating the Report

20.3 Shipped Products Detail Report (SHIPREP)

20.3.1 Intended Use

Use this screen to generate a report of products shipped to specified consignees at either a detail or summary level. The reports can be restricted to specific products, customer types, consignees, and blood types within a specified time frame.

20.3.2 Accessing the Screen

Access this screen from the Distribution Reports menu or by entering the keyword `SHIPREP`.

20.3.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter Customer Type	Yes	No	Default is ALL
Enter List of Consignee IDs	Yes	Yes	Default is ALL
Enter Product Type	Yes	Yes	Default is ALL
Enter ABO and Rh	Yes	No	Default is ALL
Enter From Date	No	No	Default is the previous day MM-DD-YYYY
Enter To Date	No	No	Default is the current day MM-DD-YYYY
Enter Summary or Detail	No	No	Default is SUMMARY

NOTE – If the requester selects SUMMARY information, the report lists the number of units shipped within the time frame to a given consignee for each product type and blood type. If DETAIL information is selected, the report lists unit IDs, product codes, collection dates, shipment numbers, box numbers, and shipment IDs in addition to summary information.

Access the Inventory Reports using the following menu.

WellSky Corporation
Proprietary and confidential

21.1 Discard List (IMRDSCRD)

21.1.1 Intended Use

Use this screen to generate a report of products that reside in the system as laboratory discards or inventory rejects. This report gives details on discard products, such as unit ID, collection date, product code, location, status, and discard/reject reason. This report helps to locate products that have yet to be discarded and to determine what quarantined products have not yet been reconciled.

21.1.2 Accessing the Screen

Access this screen from the Inventory Reports menu or by entering the keyword `IMRDSCRD`.

21.1.3 Generating the Report

21.3 Inventory Detail Report (INVDTAIL)

21.3.1 Intended Use

Use this screen to generate a detailed report of products in inventory. This report gives details on products, such as unit ID, collection date, product code, blood type, expiration date, number of days until expiration, and product location.

21.3.2 Limitations

This report only includes products from the warehouse to which the user is associated.

21.3.3 Accessing the Screen

Access this screen from the Inventory Reports menu or by entering the keyword `INVDTAIL`.

21.3.4 Generating the Report

21.4 Inventory Summary Report (IMRSMMRY)

21.4.1 Intended Use

Use this screen to generate a summary report of products in inventory by product type. This report gives details on inventory levels, such as inventory product type, blood type, actual inventory and minimal inventory required. This report helps to target those product types that are in danger of falling below the minimum required level.

21.4.2 Accessing the Screen

Access this screen from the Inventory Reports menu or by entering the keyword `IMRSMMRY`.

21.4.3 Generating the Report

Parameter Value	Multiple Entries Allowed?	LOV Available?	Other Information
Enter Chapter ID	Yes	Yes	Enter your 3 character Chapter ID
Enter Inventory Class	Yes	No	Default is RE
Enter Product Type	Yes	No	N/A

Enter Reject Reason Code:	Yes	Yes	Use ALL for all reject reason codes defined in Lab and Distribution in the institution
Enter Interdiction Code:	Yes	Yes	Use ALL for all interdictions in Lab in the institution

21.16.4 Sample Report

This report is divided into 3 sections:

- Lab Discards – gives the final total of discards/rejected components.
- Distribution Discards – gives the final total of discards/rejected components.
- Summary – gives the totals for both Lab and Distribution.

The Lab and Distribution sections are sorted by discard date in descending order and grouped by product type.

The products are displaying based on the product type in the Lab Product Code table.

Limitation

If a BIO product is labeled through the main labeling functions, it will not appear on the discard report. BIO products must be labeled through Reject Unit/Component (REJECT) in order to appear on the report.

RBC	EXPR	Product EXPIRED!	1
RBC	IDCQ	Donor Call Back Question	1
RBC	RACC	Reportable Accident	1
WB	BIOU	BIO Unit	1
WB	CLOT	Clot In Component	1

The Summary section displays the total discarded products in Lab, Distribution, and the two together. The section listing the product types and reject code is the accumulation of reject codes and interdictions between Lab and Distribution.

NOTE – The summary of the reject reason is limited based on the code and the description of the code. If you have the same code, but different descriptions, they will be listed as separate entries.

NOTE – If the product is packed through the screen Pack Lab Discards to Discard (PACKLD), the products will be seen under the Lab section and not under the Distribution section.

NOTE – If you perform Generate Outdates Picklist (OUTDATE), and then Move Outdates to Outdate Location (MOVEOUT) and run the report, the unit and product will be under the Distribution section and will have EXP under customer with 0000 for the reason. This indicates that the product was expired and outdated.

W633320083197-N	09-30-23	WB	E0009100	0000	EXP

-------- Subtotal for WB : 1

Once the product is packed and shipped, it will display the discard customer ID by the unit.
