DONOR: Please Read And Sign Donor Statement

PLEASE READ AND SIGN THE FOLLOWING CONSENT AND ACKNOWLEDGEMENT

I have read the provided materials and I understand the information about donating blood and the transmission of infectious diseases. I certify that to the best of my knowledge, I have answered ALL questions truthfully regarding my medical history and age. If I am at risk for spreading the AIDS virus, I agree not to donate any blood product for a patient. I understand the procedure of giving blood, the possible risks, and the possibility of bruising, discomfort, light-headedness and rarely fainting. I am voluntarily donating my blood to Children's Hospital Colorado to be tested and used as deemed appropriate. I understand the blood I donate will be tested for blood type, hepatitis, syphilis, HIV I/II (AIDS associated virus) and other infectious agents. We may use a small portion of your blood for research. There may be circumstances in which infectious disease tests are not performed on your donation, such as collections that are insufficient. Any positive test result may prevent the blood from being used for transfusion. You will be notified of any test results that are of importance to your health or that affect your ability to donate. To better interpret and understand the results of tests it may be necessary to contact you for follow-up testing or history. State law requires positive tests, including HIV, be reported to the Colorado State Health Department. I give my consent to have a phlebotomist draw blood from me today. I have been given the opportunity to have my questions answered and know that I may withdraw from donating at any time.
